For their Third Consolidated Amended Complaint (“Complaint”) against Defendants National Collegiate Athletic Association (“NCAA”), Pac-12 Conference (“Pac-12”), Big Ten Conference (“Big Ten”), Big Twelve Conference (“Big 12”), Southeastern Conference (“SEC”), and Atlantic Coast Conference (“ACC”), Plaintiffs, on their own behalf and on behalf of all others similarly situated, allege as follows:

I. INTRODUCTION

1. The hard work of college athletes has translated into billion-dollar television deals, multi-million-dollar coaching salaries, extravagant facilities, and lucrative commercial licensing and sponsorship agreements that greatly benefit the NCAA and its member conferences and schools as well as NCAA executives, conference administrators, and college coaches. For those in positions of power at the NCAA or a Division I conference or school, the college sports industry has become immensely profitable. Indeed, each of the Power Five (or “P5”) Conference commissioners are making more than \$2.5 million annually, with the highest paid—former Big Ten commissioner, Jim Delany—reportedly earning \$10.3 million in his final year at the conference.¹ The salaries for the top head coaches in FBS football and Division I men’s basketball exceed \$11 million per year,² and compensation packages for the top head coaches in Division I women’s basketball exceed \$3 million per year.³ This compensation continues to rise, with salaries for coaches in the Power Five Conferences increasing in 2023 by a “whopping 14.3% . . . from 2022.”⁴ The head football or basketball coach is the highest-paid public employee in states throughout the country, dwarfing the

¹ Zach Barnett, *Here’s how much each Power 5 conference raked in last year*, Footballscoop (July 10, 2020), <https://footballscoop.com/news/heres-how-much-each-power-5-conference-raked-in-last-year>.

² Amanda Christovich and Doug Greenberg, *Who Is Highest-Paid Coach in College Football?*, Front Office Sports (October 4, 2023), <https://frontofficesports.com/who-are-highest-paid-college-football-coaches/>.

³ Greg Lee and Amanda Christovich, *Who Is The Highest-Paid Women’s College Basketball Coach?*, (November 6, 2023), <https://frontofficesports.com/who-is-the-highest-paid-womens-college-basketball-coach/>.

⁴ Tom Schad and Steve Berkowitz, *Why College Football is King in Coaching Pay—Even at Blue Blood Basketball Schools*, USA Today (October 3, 2023), <https://www.usatoday.com/story/sports/ncaaf/2023/10/03/college-football-coach-pay-is-soaring-even-at-basketball-schools/70924373007/>.

1 salaries of college presidents and all other state employees.⁵ The profligate spending on coaches is
 2 exemplified by the fact that Texas A&M University went so far as to—when firing its head football
 3 coach, Jimbo Fisher, in November 2023—agree to pay Fisher more than *\$76 million* to buy out the
 4 remainder of his contract.⁶ In other words, they are paying him \$76 million to *not* coach.

5 2. This spending on coaches and athletic directors and conference commissioners has no
 6 end. A September 2023 report from the Knight Commission on Intercollegiate Athletics contains a
 7 financial analysis from CliftonLarsonAllen (CLA), which has projected that within ten years, P5
 8 public institutions’ spending on football coaches (\$1.363 billion) would virtually equal the spending
 9 on athletic scholarships and medical expenses for *all athletes* across *all sports* at those same schools
 10 (\$1.372 billion).⁷

11 3. Although student-athletes provide their labor to fuel the industry, and they are the
 12 individuals whose athleticism, hard work, and character make college sports so popular, these same
 13 young men and women have received only a tiny fraction of the revenues they generate, while facing
 14 severe penalties for failing to abide by a labyrinth of rules that restrict meaningful financial
 15 participation in the Division I football/basketball financial juggernaut and restrict for all athletes, in
 16 whole or now in part, the compensation they may receive from their schools, conferences, or third
 17 parties for their athletic services and the use of their “NIL.”⁸

18 4. Through its Constitution and Bylaws, the NCAA and its members have adopted
 19 regulations governing all aspects of college sports, including the conduct of schools, conferences,
 20 third-party business partners, and student-athletes. Among the many areas that the NCAA regulates
 21 are the compensation and benefits that athletes may receive while participating in college sports. At

 28 [content/uploads/2023/09/cla_financial_projections_report_2023.pdf](https://www.knightcommission.org/wp-content/uploads/2023/09/cla_financial_projections_report_2023.pdf), at p. 2.

⁸ “NIL” refers to name, image and likeness.

1 various points in time, the NCAA has claimed that these rules are necessary to promote the NCAA's
2 principle of "amateurism" and to preserve "a clear line of demarcation between intercollegiate
3 athletics and professional sports"—a demarcation that applies only to athletes and not to coaches or
4 administrators or schools or even to non-athlete college students.

5 5. In addition, in the name of "cost containment," the NCAA also regulates the number
6 of players in a sport who may receive athletic scholarships (in so-called "counter sports"), or the
7 overall scholarship amount available in a sport (in so-called "equivalency sports"). Therefore, the
8 NCAA rules deny scholarships to Division I athletes who would otherwise be offered scholarships
9 but for the restraints of trade imposed by the scholarship restrictions. Had the NCAA and Division I
10 members not agreed to impose the scholarship restraints, free and open competition to provide
11 additional scholarships would have occurred.

12 6. The NCAA proclaims that its overarching purpose is "to create a safe, and equitable
13 environment that allows student-athletes to reach their full potential in academics, athletics and life,"
14 and that it is "united around one goal: creating opportunities for college athletes." The NCAA further
15 purports to protect college athletes from commercial exploitation, yet it has conspired to create an
16 anticompetitive market where student-athletes have been unable to benefit from the same
17 opportunities that are available to their fellow classmates and powerless to realize the commercial
18 value available for their athletic services and NILs. These young men and women—often from
19 socio-economically disadvantaged backgrounds—are deprived of the economic and other benefits
20 that the market would pay.

21 7. The NCAA and its members have committed violations of the federal antitrust laws
22 and common law by engaging in an overarching conspiracy to: (a) fix the amount that student-
23 athletes may be paid for the licensing, use, and sale of their names, images, and likenesses at zero;
24 (b) foreclose student-athletes from the market for licensing, use, and sale of their names, images, and
25 likenesses entirely; (c) fix the amount that student-athletes may be paid for their athletic services at
26 no more than the value of a scholarship; and (d) limit the quantity of athletic scholarships available
27 in the market for student-athletes' labor services. In addition to violating the antitrust laws,
28

1 Defendants have also unjustly enriched themselves and their for-profit business partners while
2 causing extensive damage to the student-athletes.

3 8. Accordingly, on behalf of a class of Division I student-athletes, Plaintiffs request an
4 injunction permanently restraining Defendants from enforcing all of their unlawful and
5 anticompetitive rules that restrict the compensation available to class members from conferences and
6 schools, and that limit the number of athletic scholarships available to class members.⁹

7 9. On behalf of the previously certified Football and Men's Basketball Class, as
8 amended herein, Plaintiffs seek the compensation that these class members would have received
9 from their schools or conferences absent Defendants' unlawful restraints on pay-for-play
10 compensation, a share of game telecast revenue and compensation that these class members would
11 have received from their schools or conferences for their Broadcast NILs ("BNIL"), and the
12 compensation that these class members would have received for their NILs from third parties for use
13 in video games and in individual NIL agreements, including marketing, sponsorship, social media,
14 branding, promotional and other NIL deals.¹⁰

15 10. On behalf of the previously certified Women's Basketball Class, as amended herein,
16 Plaintiffs seek the compensation that these class members would have received from their schools or
17 conferences absent Defendants' unlawful restraints on pay-for-play compensation, a share of game
18 telecast revenue and compensation that these class members would have received from their schools
19 or conferences for their BNILs, and the compensation that these class members would have received
20 for their NILs from third parties in individual NIL agreements, including marketing, sponsorship,
21 social media, branding, promotional and other NIL deals.¹¹

22
23 ⁹ The Declaratory and Injunctive Relief Class is defined as: "All NCAA athletes who compete
24 on, or competed on, a Division I athletic team at any time between June 15, 2020 through the date of
any injunctive relief ordered by the Court." *See infra* Part VII.

25 ¹⁰ The Football and Men's Basketball Class is defined as "All current and former college athletes
26 who have received full Grant-in-Aid (GIA) scholarships and compete on, or competed on, a Division
I men's basketball team or an FBS football team, at a college or university that is a member of one of
the Power Five Conferences (including Notre Dame), at any time between June 15, 2016 and the date
of final judgment in this matter." *See infra* Part VII.

27 ¹¹ The Women's Basketball Class is defined as "All current and former college athletes who have
28 received full GIA scholarships and compete on, or competed on, a Division I women's basketball at

11. On behalf of the previously certified Additional Sports Class, as amended herein, Plaintiffs seek the compensation that these class members would have received from schools or conferences absent Defendants' unlawful restraints on pay-for-play compensation and the compensation that these class members would have received for their NILs from third parties in individual NIL agreements, including marketing, sponsorship, social media, branding, promotional and other NIL deals prior to July 1, 2021.¹²

II. JURISDICTION AND VENUE

12. This Court has subject matter jurisdiction pursuant to 28 U.S.C. § 1331 (federal question) and 28 U.S.C. § 1337 (commerce and antitrust regulation), as this action arises under Section 1 of the Sherman Act, 15 U.S.C. § 1, and Sections 4 and 16 of the Clayton Act, 15 U.S.C. 28 U.S.C. §§ 15(a) and 26. The Court also has jurisdiction over this matter under 28 U.S.C. § 1332(d), in that this is a class action in which the matter or controversy exceeds the sum of \$5,000,000, exclusive of interest and costs, and in which some of the members of the proposed class are citizens of a state different from the Defendants.

13. Venue is proper because Defendants reside, are found, have agents, and transact business in this District as provided in 28 U.S.C. §§ 1391(b) and (c) and in Sections 4 and 12 of the Clayton Act, 15 U.S.C. §§ 15 and 22.

14. This Court has personal jurisdiction over Defendants because, *inter alia*, they: (a) transacted business throughout the United States, including in this District; (b) participated in organizing intercollegiate athletic contests, and/or licensing or selling merchandise throughout the United States, including in this District; (c) had substantial contacts with the United States, including

a college or university that is a member of one of the Power Five Conferences (including Notre Dame), at any time between June 15, 2016 and the date of final judgment in this matter." *See infra* Part VII.

¹² The Additional Sports Class is defined as "Excluding members of the Football and Men's Basketball Class and members of the Women's Basketball Class, all other current and former Division I college athletes who competed on a Division I athletic team at any time between June 15, 2016 and the date of final judgment in this matter, including but not limited to those who (i) have received a full or partial GIA; and/or (ii) received compensation for the use of their name, image, and likeness since July 1, 2021 while a college athlete if they competed in the same Division I sport prior to July 1, 2021." *See infra* Part VII.

in this District; and (d) were engaged in an illegal anticompetitive scheme that was directed at and had the intended effect of causing injury to persons residing in, located in, or doing business throughout the United States, including in this District. Numerous NCAA Division I universities or colleges also are found within this District, *e.g.*, the University of California–Berkeley (“Cal”), Stanford University, Santa Clara University, the University of San Francisco (“USF”), and St. Mary’s College.

III. PARTIES

A. Plaintiffs

1. Grant House

15. Plaintiff Grant House, an individual, is a resident of Tempe, Arizona and a former Division I athlete who competed for the Arizona State University (“ASU”) men’s swimming and diving team through the 2022-23 academic year.

16. Before college, House was a heavily recruited star athlete from Maineville, Ohio. He was named Greater Cincinnati Male Swimmer of the Year four years in a row (2013-2016), and he is the winningest athlete in Ohio High School Athletic Association (“OHSAA”) history with 13 state swimming championships—eight as an individual and five on relays—as well as a 2016 state championship in water polo. He was also a two-time National Swimming Club Association (“NSCA”) national champion, a 2016 Olympic trials qualifier, and he competed in the 2015 Junior World Championships in Singapore, winning a gold medal in the 4x200m freestyle relay.

1 17. As the number four swimming recruit in the nation coming out of high school, House
2 received scholarship offers from numerous top-caliber Division I programs including the University
3 of Texas, Ohio State University, the University of California–Berkeley, the University of Louisville,
4 the University of Indiana, and Arizona State University. He ultimately accepted a scholarship offer
5 and committed to swim and attend school at ASU in the fall of 2016 and he enrolled at ASU in the
6 fall of 2017. House received a partial athletic scholarship and a partial academic scholarship.

7 18. House swam in his first college meet in the fall of 2017 and he was an immediate
8 impact player for ASU, breaking multiple school time records and ultimately being named the Sun
9 Devils’ Most Valuable Men’s Swimmer as a true freshman. At the 2018 Pac-12 Championships, he
10 earned a podium finish (3rd) in the 200yd free, placed 11th in the 500yd free and 12th in the 100yd
11 free, and he helped his team to a 2nd place finish in the 4x200yd free relay. At the 2018 NCAA
12 Championships, he finished 10th in nation in the 4x200yd free relay and 14th in the 200yd free,
13 earning two NCAA All-American honorable mentions.

14 19. As a sophomore, House continued to dominate in the pool for ASU. At the 2019 Pac-
15 12 Championships, he led the Sun Devils’ 4th place 4x200yd free relay, and placed 2nd in the 200yd
16 free, 4th in the 200yd individual medley, and 10th in the 200yd breaststroke. At the 2019 NCAA
17 Championships, his relay team placed 8th in the 4x100yd free and 9th in the 4x200yd free, and he
18 finished 10th individually in the 200yd breaststroke. With these performances he earned two more
19 NCAA All-American honorable mentions as well as his first All-American honor.

20 20. In addition to college competition, House also competed in the 2019 Pan American
21 Games in Lima, Peru as a member of the U.S. 4x100m and 4x200m relay teams, which each finished
22 2nd, and individually in the 200m free, finishing 6th. House also represented Team USA at the 2019
23 World University Games in Naples, Italy where he led his team to a gold medal finish in the men’s
24 4x200m free relay.

25 21. Along with his many athletic achievements, House was also an outstanding student
26 who, as a sophomore with a 4.0 GPA, was named to the 2019 Google Cloud Academic All-America
27 Division I Men’s At-Large team. He graduated with a Bachelor of Science in Exercise Physiology
28 and Wellness in 2022, completed a Sports Law & Business Master of Laws degree in 2023, and

1 plans to one day start his own business offering performance consultation services to Olympic
2 hopefuls and other elite athletes.

3 22. On September 6, 2019, House announced his decision to take an Olympic redshirt
4 year, sitting out of what would have been his junior season with ASU to train for the U.S. Olympic
5 Trials. House trained for the Olympics under ASU coach Bob Bowman, who was formerly the head
6 coach of the 2016 men's U.S. Olympic team and is perhaps best known as the long-time coach of
7 record-breaking Olympian Michael Phelps. In an interview with USA Swimming, Bowman
8 expressed his high regard for House: "Grant House is one of the hardest working swimmers I've ever
9 coached. He's gone from being a promising junior swimmer to a bona fide world-class
10 competitor."¹³

11 23. Along with his efforts in the pool and in the classroom, House also took on a
12 proactive leadership role in his academic and athletic communities. He was involved on his own
13 college campus as a member of the Sun Devil Athletics Board, an advisory group comprised of nine
14 faculty and four students charged with informing the ASU president on policies, programs, and other
15 matters pertaining to intercollegiate athletics. House also represented ASU athletes, and worked to be
16 a part of the broader discussion about issues affecting all Division I athletes, as a member of both the
17 Pac-12 Student-Athlete Advisory Committee and Pac-12 Student-Athlete Leadership Team, and as
18 President of the NCAA Division I Student-Athlete Advisory Committee at ASU.

19 24. As a star athlete as well as an exceptional student and leader, House has built a
20 valuable reputation and name for himself within the local Tempe, Arizona community and the world
21 of swimming in general. House has also established an online following through his own personal
22 social media accounts on Twitter, Facebook, Instagram, and Snapchat, as well as an internet
23 podcast—Swim Bros Podcast—which he and his brother created in 2016. Through Swim Bros
24 Podcast, House and his brother discuss a wide range of topics related to the sport of swimming at
25
26

27 ¹³ USA Swimming Release, *Swimming's House Named to World University Games Roster*, Oct.
28 18, 2018, <https://thesundevils.com/news/2018/10/18/mens-swimming-diving-swimmings-house-named-to-world-university-games-roster.aspx> (last visited July 25, 2021).

1 both the collegiate and Olympic levels and feature interviews with athletes and other guests who
2 offer their own perspectives and provide insight on various current events in the world of swimming.

3 25. ASU benefits greatly from the positive associations it is able to build with its star
4 athletes, including House, through promotional activities featuring the athletes. House has created
5 and/or been involved with numerous “hype” videos and other promotional content that the Sun
6 Devils’ marketing team has posted or reposted on its various social media accounts. In 2018, for
7 example, House was asked to speak on behalf of the school’s athletic nutrition program in several
8 videos that were published as part of a promotional campaign on the official Twitter feed of Sun
9 Devil Sports Nutrition (@FueltheFork). Photos of House and replays of his best races were posted
10 regularly on ASU’s social media accounts, and he was also featured on the school’s official swim &
11 dive meet schedule. However, until July 1, 2021, House failed to derive any personal profit from his
12 social media activity or any other use of his name, image, or likeness because NCAA rules
13 prohibited him from doing so.

14 26. Mr. House has been a valuable asset to ASU and the Pac-12. But the NCAA’s pay-
15 for-play rules prohibited him from earning any compensation or benefits for his athletic services,
16 aside from the limited (and fixed) categories of compensation that Defendants allow (primarily an
17 athletic scholarship). But-for the NCAA’s anticompetitive rules prohibiting pay-for-play
18 compensation—and the Conference Defendants’ associated rules, *see* ¶ 127 *infra*—House would
19 have received substantial additional compensation in the relevant labor market for his services. He
20 was harmed by these anticompetitive rules.

21 27. House has experienced anticompetitive harm due to the NCAA’s restraints on athletic
22 scholarships, which have artificially limited his ability to earn an athletic scholarship and the amount
23 thereof.

2. Sedona Prince

28. Plaintiff Sedona Prince, an individual, is a resident of Fort Worth, Texas and a current Division I athlete who competes for the Texas Christian University (“TCU”) women’s basketball team.

29. Before college, the 6-foot-7 forward was a heavily recruited star athlete from Liberty Hill, Texas. Prince started in all 154 of her high school games, totaling 2,759 points scored, 1,493 rebounds, and 924 blocked shots by the end of her senior year. In 2018, she was a McDonald’s High School All-American and Jordan Brand Classic participant, and she capped her stellar high school career by being named the Texas Girls Coaches Association Basketball Athlete of the Year.

30. In addition to interscholastic competition, Prince also competed with the U.S. national team at the 2015 FIBA U16 Americas Championship in Puebla, Mexico, and the 2016 FIBA U17 World Championships in Zaragoza, Spain, where Team USA won bronze medals.

31. Coming out of high school, ESPN ranked Prince the No. 8 recruit in the nation, and she received full athletic scholarship offers from numerous top Division I programs, including the University of Connecticut, University of Notre Dame, University of Louisville, and University of Texas at Austin (“UT”). She ultimately accepted the offer from Texas and committed to play basketball and attend school at UT starting in the fall of 2018.

1 32. Prince redshirted her freshman season with the Texas Longhorns after suffering a
2 serious leg injury while representing Team USA at the U18 FIBA Americas Championship in
3 Mexico City in the summer of 2018, where Team USA won the gold medal.

4 33. Prince had to undergo several surgeries and other medical procedures after her injury,
5 incurring bills in the tens of thousands of dollars. She was incredibly stressed about her injuries, not
6 knowing if she would ever play again. And the economic strain made it even worse. She was
7 particularly upset that NCAA rules prohibited her from obtaining outside compensation based on her
8 name and image, including from social media or endorsements, to help pay these substantial bills.
9 While Prince feels fortunate that she was able to receive some financial help from her parents, she
10 knows that many other student-athletes from underprivileged backgrounds do not have the benefit of
11 such support and, in the event of an injury, are instead left with significant personal debt.

12 34. In the summer of 2019, Prince decided to transfer to the University of Oregon (“UO”)
13 but, due to NCAA transfer rules, she was forced to sit out of the 2019-20 season with the Ducks.

14 35. Although UO applied for a hardship waiver to restore her freshman year of eligibility,
15 the NCAA denied the request. She was able to travel with the team, but she could not play in the
16 games. At the time, UO basketball fans started making “Free Sedona” t-shirts in support of Prince’s
17 efforts to be allowed to compete. The fans asked Prince if she wanted to sell shirts herself to make
18 some money, but she had to decline because she believed that if she sold any apparel with her name
19 or likeness on it, she would get in trouble with the NCAA. That really hit home with her as a
20 demonstration of how absurd and unfair the NCAA’s NIL rules truly are.

21 36. Prince transferred to, and is currently playing for, TCU, where she is pursuing a
22 Master of Liberal Arts degree. As a redshirt sophomore in the 2020-21 season, she was a leading
23 player for UO’s women’s basketball team and instrumental in helping UO reach the NCAA
24 Championship Tournament Sweet 16.

25 37. As an elite athlete and rising star in the world of women’s basketball, Prince has
26 already created a name for herself among fans, and she has established a significant online following
27 through her personal social media accounts. As of July 11, 2024, Prince had 2.7 million followers
28 and 194.4 million likes on TikTok (@sedonerrr), 167,000 followers on Instagram (@sedonaprince)

1 and 38,800 followers on Twitter (@sedonaprince_). While attending college, Prince has been
2 involved in several multimedia campaigns for the basketball programs at her schools, including a
3 campaign promoting the UO women's basketball team, which has some of the best attendance and
4 viewership figures in all of women's college basketball.

5 38. Prince is very interested in business and entrepreneurship, and took college classes on
6 these subjects. She is particularly interested in brand-building and is working hard to learn more
7 about how she can grow her personal brand value, including on social media and for other potential
8 sponsorship opportunities.

9 39. Prince also plans to continue to use her voice to promote positive social change. At
10 the University of Texas, she was a founder of the athlete-led organization, Outletes and Allies, which
11 was created to be a safe space for LGBTQIA+ student-athletes and allies at the university. Prince
12 helped organize monthly meetings with speakers, and she is very proud that this work put the
13 University of Texas ahead in the Big 12 Conference in terms of promoting LGBTQIA+ inclusivity.

14 40. Prince has also used her platform to bring awareness to current gender inequalities
15 within the world of NCAA college sports. She highlighted some of the significant disparities
16 between the resources provided to the men's and women's teams in the 2021 March Madness
17 championship tournament in a video she posted to her TikTok that went viral shortly thereafter. She
18 plans to use her voice in the future to continue supporting positive social change.

19 41. Prince never derived any personal profit from her schools' use of her name, image
20 and likeness in its broadcast, marketing, and social media, and other activities to generate ticket sales
21 and other revenues for the school because NCAA rules prohibited her from doing so. Until July 1,
22 2021, Prince had never derived any personal profit from her social media activity or any other use of
23 her name, image, or likeness because NCAA rules prohibited her from doing so. However, since
24 some of the rules were suspended, she has been contacted by several major brands regarding
25 potential endorsement deals and has already earned more than \$20,000 through social media alone.

26 42. Ms. Prince has been a valuable asset to the schools for which she has played. As a
27 high-performing player on the women's basketball team, she helped to generate substantial revenues
28 that derived from, among other things, broadcasting agreements, ticket sales, and sponsorships. But

the NCAA's pay-for-play rules prohibited her from earning any compensation or benefits for her athletic services, aside from the limited (and fixed) categories of compensation that Defendants allow (primarily an athletic scholarship). But-for the NCAA's anticompetitive rules prohibiting pay-for-play compensation—and the Conference Defendants' associated rules, *see* ¶ 127 *infra*—Prince would have received substantial additional compensation in the relevant labor market for her services. She was harmed by these anticompetitive rules.

3. Tymir Oliver

43. Plaintiff Tymir Oliver, an individual, is a Division I athlete who competed for the University of Illinois men's football team.

44. Before college, Mr. Oliver was a highly recruited star athlete. He was given a three-star ranking by both 247 Sports and ESPN.com and ranked as a top-30 recruit in Pennsylvania. ESPN.com ranked him as No. 24 and 247 Sports had him as its No. 28 ranked player. In 2015, he was selected First-Team All-State by the Pennsylvania Football Writers Association. He was also named All-State twice and All-City three times. He captained his football team as both a junior and senior while also being ranked in the top five of his graduating class.

45. Mr. Oliver received full athletic scholarship offers from numerous elite Division I programs, including Boston College, Northwestern, Michigan State, University of Virginia, University of Pittsburgh, Rutgers, and Temple. He ultimately accepted the offer from University of Illinois starting in 2016 because he thought it was a chance to be a part of something great.

1 46. Mr. Oliver played in twelve games as a freshman, mostly on special teams, and in his
2 sophomore year, he was selected as a Team Captain playing in twelve games, while starting ten at
3 defensive tackle. During his sophomore season Oliver had 33 tackles, 4.5 tackles for losses (tied for
4 second on the team), 3.0 sacks (tied for third on the team), while also having two pass defenses and
5 two hurries. In his junior season he started all twelve games at defensive tackle with 27 tackles, 2.5
6 tackles for losses, 1.0 sacks, four pass break-ups, and one quarterback hurry. He also had a career-
7 high seven tackles against rival Iowa. In his senior season, Oliver played in 13 games with 12 solo
8 tackles and 17 assisted tackles with 4.5 tackles for losses. He tied his career-high with seven tackles
9 versus No. 6 ranked Wisconsin to help Illinois win 24-23 and achieve one of the biggest upsets in
10 Big Ten history.

11 47. As an elite athlete and Team Captain, Mr. Oliver's name and face were repeatedly
12 used by the University of Illinois to generate money by selling tickets and jerseys. For example, the
13 University of Illinois used his image for homecoming pictures and during his junior year, Oliver was
14 also required to participate in a photoshoot for the new University of Illinois Nike jersey reveal. His
15 picture was published front and center on the "Fighting Illini" webpage, advertising that the "new
16 blue jerseys will be available for fans to purchase this fall."¹⁴ He was also included in a video
17 montage used to introduce and sell the University of Illinois' new jerseys. In addition, Oliver's
18 image was featured on tickets and flyers all around campus promoting the team and its upcoming
19 games. And his picture was also used by the university on its various social media accounts to
20 promote games and open practices. The Fighting Illini Football website and other University of
21 Illinois social media accounts would have pre- and post-game content that included Mr. Oliver to
22 promote the sale of tickets and merchandise.

23 48. Mr. Oliver never derived any personal profit from the University of Illinois's use of
24 his name, image and likeness in its broadcast, marketing, and social media, and other activities to
25
26

27 ¹⁴ See Illini Football Release, *Fighting Illini Football Unveils New Uniform Designs*,
28 fightingillini.com, Apr. 6, 2018, <https://fightingillini.com/news/2018/4/5/football-fighting-illini-unveil-new-uniform-designs.aspx> (last visited July 26, 2021).

1 generate ticket sales and other revenues for the school because NCAA rules prohibited him from
2 doing so.

3 49. Mr. Oliver has been a valuable asset to the University of Illinois and the Big Ten. As
4 a high-performing player on the football team, he helped to generate substantial revenues that the
5 university and the Conference derive from Illinois football, through, among other things,
6 broadcasting agreements, ticket sales, and sponsorships. But the NCAA's pay-for-play rules
7 prohibited him from earning any compensation or benefits for his athletic services, aside from the
8 limited (and fixed) categories of compensation that Defendants allow (primarily an athletic
9 scholarship).

10 50. But-for the NCAA's anticompetitive rules prohibiting pay-for-play compensation—
11 and the Conference Defendants' associated rules, *see* ¶ 127 *infra*—Oliver would have received
12 substantial additional compensation in the relevant labor market for his services. He was harmed by
13 these anticompetitive rules.

14 4. DeWayne Carter

25 51. Plaintiff DeWayne Carter ("Carter") is a resident of Buffalo, New York, and played
26 defensive tackle for Duke University's ("Duke") football team.
27
28

52. Carter was a heavily recruited star athlete from Pickerington, Ohio. He was a 4-year letterman at Pickerington Central and was rated the No. 33 defensive tackle in the nation according to *Rivals.com* and *247Sports.com*. With help from Carter, Pickerington Central reached the OHSAA Division I semifinals during Carter's sophomore and senior years and won the state title Carter's junior year. Carter was a 2-time all-conference and all-district selection. And his senior year, he was a team captain and earned first team all-state honors from the Associated Press.

53. As a coveted 3-star recruit, Carter had full scholarship offers from roughly 20 Power Five schools, including the University of Michigan, the University of Tennessee, Notre Dame, Boston College, and Duke. He ultimately accepted a full scholarship offer from, committed to play football for, and enrolled at Duke in the summer of 2019.

54. Carter redshirted the 2019 season—playing 3 games that season—and played all 11 games in the 2020 season. During the 2020 season, Carter received the Ace Parker Award—an honor that Duke's football program "present[s] annually to an individual who displays unparalleled commitment to the team and overcomes adversity to contribute."¹⁵

55. In 2021, as a redshirt sophomore, Carter was named team captain: an honor that he held every season since. He was the first player in program history to earn that honor for 3 seasons.

56. Carter's on-field accomplishments in 2021 were far-reaching. He started 12 games, was on field for 801 snaps, and was first in the ACC and tied for eleventh in the nation in forced fumbles. He was selected the ACC Defensive Lineman of the Week, after having 3 tackles, 2 forced fumbles, 1 pass-breakup, and 1 quarterback-pressure against Northwestern. He was a Third Team All-ACC selection and the recipient of the program's Mike McGee Award—an honor presented each year to the team's top defensive lineman.

57. In 2022, Carter started all 13 games, and was, again, a gamechanger. He tied for first in the ACC and third nationally in fumble recoveries, and was fourth in the ACC and thirteenth nationally in forced fumbles. He returned a fumble 35 yards for a touchdown against NC A&T—the

¹⁵ *DeWayne Carter*, Duke University, <https://goduke.com/sports/football/roster/dewayne-carter/19207>.

1 sixth-longest fumble recovery for a touchdown in program history—and registered 2 pass-breakups
2 against the University of Central Florida in the Military Bowl, making him 1 of just 7 players in
3 Duke history to do so in a bowl game. As a result of his achievements, Carter was a Second Team
4 All-ACC selection and Third Team All-America selection by College Football Network.

5 58. In 2023, as a returning starter, Carter played in each of Duke’s 12 regular-season
6 games. He is just the seventeenth player in Duke history to record 11.5 career sacks and is fourth in
7 program history in forced fumbles. Carter led Duke to a victory in the Birmingham Bowl on
8 December 23, 2023.

9 59. Along with his many athletic achievements, Carter was an outstanding student. He
10 majored in psychology, with a double minor in theater and education. In 2021 and 2022, he was
11 named an Arthur Ashe Jr. Sports Scholars finalist, which honors students of color who have excelled
12 both in the classroom and in their sport. He is a 3-time ACC Academic Honor Roll recipient, and in
13 2023, he received the ACC’s Jim Tatum Award, which goes to the top senior student-athlete in the
14 Conference.

15 60. Carter was an active member of Duke’s United Black Athletes and Student-Athlete
16 Advisory Committee and represented the school on the Division I NCAA Football Oversight
17 Committee Student-Athlete Connection Group. Showing his commitment to the broader Durham
18 community, Carter worked with Habitat for Humanity, tutored at KIPP Durham College Preparatory
19 School and Durham Public School Ignite, made time to read to youths at Southwest and Glenn
20 Elementary, and coached youth league baseball for First Calvary Baptist Church.

21 61. Following graduation, Carter was drafted in the NFL by the Buffalo Bills in the third
22 round. After his NFL career, Carter plans to become a teacher and open a community center to
23 continue being a strong male role model.

24 62. Carter never derived any personal profit from Duke’s use of his name, image and
25 likeness in its broadcast, marketing, and social media, and other activities to generate ticket sales and
26 other revenues for the school because NCAA rules prohibited him from doing so.

27 63. Carter has been a valuable asset to Duke and the ACC. As a high-performing player
28 on the football team, he helped to generate substantial revenues that the university and the

Conference derive from Duke football, through, among other things, broadcasting agreements, ticket sales, and sponsorships. But the NCAA's pay-for-play rules prohibited him from earning any compensation or benefits for his athletic services, aside from the limited (and fixed) categories of compensation that Defendants allow (primarily an athletic scholarship). But-for the NCAA's anticompetitive rules prohibiting pay-for-play compensation—and the Conference Defendants' associated rules, *see* ¶ 127 *infra*—Carter would have received substantial additional compensation in the relevant labor market for his services. He was harmed by these anticompetitive rules.

5. Nya Harrison

64. Plaintiff Nya Harrison ("Harrison") is a resident of Palo Alto, California, and currently is a senior and a defender on Stanford University's ("Stanford") Division I women's soccer team. This past season, the Stanford women's soccer team defense was ranked No. 1 in the country.

65. Harrison was a highly recruited athlete from San Diego, California. She led her high school, Del Norte High School, to a quarterfinal finish at the 2018 San Diego Section CIF Division II Championship, and led her competitive club team—the San Diego Surf—to a No. 1 ranking in the 2019-2020 season.

66. In addition, Harrison is part of the United States National Team system and has competed in 5 domestic and 1 international camp for the U16 and U18 teams. She has played in 7

1 matches as part of the United States National Team program, including with the U18 team at the
2 Tricontinental Cup, and participated in the U20 Women's National Team Call-Up Camp.

3 67. Harrison was recruited by several Division I schools to play soccer, including the
4 University of Southern California, University of California – Los Angeles, University of California –
5 Berkeley, and Notre Dame. Ultimately, Harrison accepted an offer to play for, and enrolled at,
6 Stanford in August 2021. Harrison did not receive an athletic scholarship.

7 68. Harrison made an immediate impact for the Stanford women's soccer team. As a
8 freshman, in 2021, she appeared in 6 matches, and helped a back line that posted 9 shutouts and
9 limited opponents to 0.85 goals per match.

10 69. As a sophomore, in 2022, she was an integral part of a Pac-12 Championship-winning
11 team, appearing in 9 matches and leading Stanford to 12 shutouts, while limiting opponents to 0.55
12 goals per game.

13 70. As a junior, Harrison helped lead Stanford to the NCAA National Championship
14 game, starting in 11 of the 20 matches she appeared in and guiding Stanford to 14 shutouts, while
15 limiting opponents to 0.60 goals per game.

16 71. Off the pitch, Harrison is a dedicated student and advocate. She is a Bioengineering
17 major and was named to the Pac-12 Fall Academic Honor Roll in 2022 and 2023. She is the
18 President of CardinalBLCK, a group of Black college athletes that have banded together to promote
19 social justice, amplify Black voices both inside and outside of athletics, and create a community to
20 endure beyond the athletes' time at Stanford.

21 72. After her senior season, Harrison hopes to play soccer professionally.

22 73. Until July 1, 2021, Harrison never derived any personal profit from her social media
23 activity or any other use of her name, image, or likeness because NCAA rules prohibited her from
24 doing so.

25 74. Harrison has been harmed, and is continuing to being harmed, by the NCAA's rules
26 prohibiting pay-for-play—and the Conference Defendants' associated rules, *see* ¶ 127 *infra*—which
27 have artificially restricted her from earning compensation for her athletic services in the relevant
28 labor market.

1 75. Harrison has experienced anticompetitive harm due to the NCAA’s restraints on
2 athletic scholarships, which have artificially limited her ability to earn an athletic scholarship and the
3 amount thereof.

4 **6. Nicholas Solomon**

14 76. Plaintiff Nicholas Solomon (“Solomon”) is a resident of New York, New York, and a
15 former Division I athlete on the men’s lacrosse teams at the University of North Carolina – Chapel
16 Hill (“UNC”) and Georgetown University (“Georgetown”).

17 77. Solomon was a highly touted athlete from Alpharetta, Georgia. Solomon was a
18 standout lacrosse athlete at Centennial High School—he is the all-time points leader in Georgia
19 history, a three-time All American, the first player in Georgia to be named the Most Valuable Player
20 in the Under Armour All American Game, ranked second highest in points in the country, and was
21 named the 2018 South Player of the Year. Unsurprisingly, he was recruited to play lacrosse at several
22 other Division I schools in addition to UNC, including the University of Michigan, Syracuse
23 University, and Ohio State University. Ultimately, Solomon chose to attend UNC because of his
24 personal affinity for the school, UNC’s esteemed lacrosse program, and the school’s strong
25 academics.

26 78. Solomon enrolled at UNC in the fall of 2018 on a partial athletic scholarship valued at
27 \$10,000. His scholarship varied each year—\$20,000 his sophomore year, \$16,225 his junior year,
28

1 and \$24,000 his senior year—but he never received a full athletic scholarship. Solomon paid the
2 difference between his partial athletic scholarship and the full cost of attending UNC.

3 79. Solomon was an integral part of UNC’s lacrosse program. During his four years at the
4 school, he started all but four games for the Tar Heels.

5 80. He also earned academic honors, being named to the ACC’s Academic Honor Roll his
6 sophomore and senior years.

7 81. In 2022, Solomon graduated from UNC with a degree in Sports Administration and
8 Management, with a minor in Entrepreneurship.

9 82. Solomon opted to pursue a Master’s in Sports Industry Management at Georgetown,
10 and with remaining eligibility, joined Georgetown’s lacrosse team. Solomon did not receive any
11 athletic scholarship from Georgetown. He paid the full cost of attending Georgetown. He graduated
12 with his Master’s degree in 2023.

13 83. Since getting his Master’s degree, Solomon has worked in commercial real estate in
14 New York City.

15 84. Until July 1, 2021, Solomon never derived any personal profit from any use of his
16 name, image, or likeness because NCAA rules prohibited him from doing so.

17 85. Solomon was harmed by the NCAA’s rules prohibiting pay-for-play—and the
18 Conference Defendants’ associated rules, *see* ¶ 127 *infra*—which artificially restricted him from
19 earning compensation for his athletic services in the relevant labor market.

20 86. Solomon experienced anticompetitive harm due to the NCAA’s restraints on athletic
21 scholarships, which artificially limited his ability to earn an athletic scholarship and the amount
22 thereof.

23 **B. Defendants**

24 87. **National Collegiate Athletic Association (“NCAA”)** describes itself as an
25 “unincorporated not-for-profit educational organization founded in 1906,” and maintains its principal
26 place of business at 700 W. Washington Street, Indianapolis, Indiana 46204. The NCAA further
27 states that it “is the organization through which the colleges and universities of the nation speak and
28

1 act on athletic matters at the national level.” It is composed of more than 1,200 colleges, universities,
2 and athletic conferences located throughout the United States.

3 88. Through the NCAA Constitution and Bylaws, the NCAA and its members have
4 adopted regulations governing all aspects of college sports. The Constitution and Bylaws were
5 adopted by votes of the member institutions and may be amended by votes of the member
6 institutions. The NCAA has also established an enforcement program to ensure that institutions and
7 athletes comply with NCAA rules. Through its enforcement program, the NCAA has the authority to
8 impose severe penalties on member schools and athletes for non-compliance.

9 89. The NCAA includes 1,099 active member schools, and these schools are organized
10 into three Divisions. Division I includes 352 schools, including 267 with major football programs.
11 Divisions II and III include schools with much less extensive or no football programs. As a practical
12 matter, any academic institution that wishes to participate in any meaningful way in the highest and
13 most popular levels of college sports must maintain membership in the NCAA and abide by the
14 Division I rules and regulations promulgated by the NCAA and its members.

15 90. In its Consolidated Financial Statements for the fiscal year ending August 31, 2019,
16 the NCAA reported total revenues of \$1,118,495,545.¹⁶

17 91. **Pac-12 Conference (“Pac-12”)** is an unincorporated association, with its principal
18 place of business located in this District at 360 3rd Street, Third floor, San Francisco, California
19 94107. The Pac-12 is a multi-sport collegiate athletic conference, and a formal “conference member”
20 of Defendant NCAA’s Division I. In its 2017 IRS Form 990 the Pac-12 identified itself as a tax-
21 exempt organization pursuant to section 501(c)(3) of the U.S. Internal Revenue Code, and stated that,
22 for the fiscal year ending June 30, 2018, it obtained gross revenues of \$496,930,601. The Pac-12’s
23 “2018-19 Handbook” states that the conference was organized for purposes including: “[t]o provide
24 its members with a jointly governed body for sponsoring, supervising and regulating intercollegiate
25 athletics as a conference member of the National Collegiate Athletics Association (‘NCAA’) in
26
27

28 ¹⁶ NCAA Consolidated Financial Statements August 31, 2019 and 2018.

1 accordance with the principles, policies, constitution and bylaws of the NCAA” and “[t]o assist its
2 members in funding and promoting their intercollegiate athletics programs.”

3 92. The Pac-12’s current members are the following institutions: Oregon State University
4 and Washington State University.

5 93. Defendant Pac-12 during the Class Period participated in the collusive restraint of
6 trade and other violations of law alleged in this Complaint, has thereby damaged class members, and
7 will continue to damage class members unless enjoined.

8 94. **The Big Ten Conference, Inc. (“Big Ten”)** is a nonprofit corporation, organized
9 under the laws of Delaware, with its principal place of business located at 5440 Park Place,
10 Rosemont, Illinois 60018. The Big Ten is a multi-sport collegiate athletic conference, and a formal
11 “conference member” of Defendant NCAA’s Division I. In its 2017 IRS Form 990 the Big Ten
12 identified itself as a tax-exempt organization pursuant to section 501(c)(3) of the U.S. Internal
13 Revenue Code, and stated that, for the fiscal year ending June 30, 2018, it obtained gross revenues of
14 \$758,899,883.

15 95. The Big Ten’s members are the following institutions: University of California, Los
16 Angeles, University of Illinois at Urbana-Champaign, Indiana University, University of Iowa,
17 University of Maryland, University of Michigan, Michigan State University, University of
18 Minnesota, University of Nebraska–Lincoln, Northwestern University, Ohio State University,
19 University of Oregon, Pennsylvania State University, Purdue University, Rutgers University,
20 University of Southern California, University of Washington, and University of Wisconsin–Madison.
21 All of the Big Ten’s football members are also members of the NCAA’s Division I, Football Bowl
22 Subdivision.

23 96. Defendant Big Ten during the Class Period participated in the collusive restraint of
24 trade and other violations of law alleged in this Complaint, has thereby damaged class members, and
25 will continue to damage class members unless enjoined.

26 97. **The Big 12 Conference, Inc. (“Big 12”)** is a nonprofit corporation organized under
27 the laws of Delaware, with its principal place of business located at 400 East John Carpenter
28 Freeway, Irving, Texas 75062. The Big 12 is a multi-sport collegiate athletic conference, and a

1 formal “conference member” of Defendant NCAA’s Division I. In its 2017 IRS Form 990 the Big 12
 2 stated that it is a tax-exempt organization pursuant to section 501(c)(3) of the U.S. Internal Revenue
 3 Code, and that, for the fiscal year ending June 30, 2018, it obtained gross revenues of \$373,924,498.
 4 The Big 12 further stated in its IRS filing that its mission is to “organize, promote and administer
 5 intercollegiate athletics among its member institutions” and to “optimize revenues and provide
 6 supporting service sompatible [sic] with both academic and competitive excellence.”

7 98. The Big 12’s current members are the following institutions: Arizona State
 8 University, University of Arizona, Baylor University, Brigham Young University, University of
 9 Central Florida, University of Cincinnati, University of Colorado, University of Houston, Iowa State
 10 University, University of Kansas, Kansas State University, Oklahoma State University, Texas
 11 Christian University, Texas Tech University, University of Utah, and West Virginia University. All
 12 of the Big 12’s football members are also members of the NCAA’s Division I, Football Bowl
 13 Subdivision.

14 99. Defendant Big 12 during the Class Period participated in the collusive restraint of
 15 trade and other violations of law alleged in this Complaint, has thereby damaged class members, and
 16 will continue to damage class members unless enjoined.

17 100. **Southeastern Conference (“SEC”)** is an unincorporated association, with its
 18 principal place of business located at 2201 Richard Arrington Boulevard North, Birmingham,
 19 Alabama 35203-1103. The SEC is a multi-sport collegiate athletic conference, and a formal
 20 “conference member” of Defendant NCAA’s Division I. In its 2017 IRS Form 990 the SEC
 21 identified itself as a tax-exempt organization pursuant to section 501(c)(3) of the U.S. Internal
 22 Revenue Code, and stated that, for the fiscal year ending August 31, 2018, it obtained revenues of
 23 \$659,938,592. It further identified its mission is to “promote and administer intercollegiate athletic
 24 competition among its member institutions located in the Southeastern United States.”

25 101. The SEC’s current members are the following institutions: University of Florida,
 26 University of Georgia, University of Kentucky, University of Missouri, University of Oklahoma,
 27 University of South Carolina, University of Tennessee, University of Texas-Austin, Vanderbilt
 28 University, University of Alabama, University of Arkansas, Auburn University, Louisiana State

1 University, University of Mississippi, Mississippi State University, and Texas A&M University. All
 2 of the SEC's football members are also members of the NCAA's Division I, Football Bowl
 3 Subdivision.

4 102. Defendant SEC during the Class Period participated in the collusive restraint of trade
 5 and other violations of law alleged in this Complaint, has thereby damaged class members, and will
 6 continue to damage class members unless enjoined.

7 103. **Atlantic Coast Conference ("ACC")** is an unincorporated association with its
 8 principal place of business located at 620 South Tryon Street, Suite 1200, Charlotte, North Carolina
 9 28202. The ACC is a multi-sport collegiate athletic conference and a formal "conference member" of
 10 Defendant NCAA's Division I. In its 2017 U.S. Internal Revenue Service ("IRS") Form 990 the
 11 ACC stated that it is a tax-exempt organization pursuant to section 501(c)(3) of the U.S. Internal
 12 Revenue Code, and that, for the fiscal year ending June 30, 2018, it obtained gross revenues of
 13 \$464,677,828. The ACC further stated in its IRS filing that it "exists to promote and regulate inter-
 14 collegiate athletic programs for and among twelve member institutions, all of which are non-profit
 15 educational institutions."

16 104. The ACC's current members are the following institutions: Boston College,
 17 University of California, Berkeley, Clemson University, Duke University, Florida State University,
 18 Georgia Institute of Technology ("Georgia Tech"), University of Miami, University of North
 19 Carolina–Chapel Hill, North Carolina State University, University of Pittsburgh, Southern Methodist
 20 University, Stanford University, Syracuse University, University of Virginia, Virginia Polytechnic
 21 Institute and State University ("Virginia Tech"), Wake Forest University, and the University of
 22 Louisville. Also, as the ACC stated in its 2012-13 annual report, the University of Notre Dame
 23 "officially joined the ACC on July 1, 2013 ... Notre Dame will compete as a full member in all
 24 conference sponsored sports with the exception of football, which will play five games annually
 25 against league programs."

26 105. Defendant ACC during the Class Period participated in the collusive restraint of trade
 27 and other violations of law alleged in this Complaint, has thereby damaged class members, and will
 28 continue to damage class members unless enjoined.

1 106. Defendants Pac-12, Big Ten, Big 12, SEC, and ACC are collectively referred to
2 herein as the “Power Five Conference Defendants” or “Conference Defendants,” and these
3 conferences are referred to collectively in this Complaint as the “Power Five” or “Power Five
4 Conferences.”

5 107. Whenever in this Complaint Plaintiffs make reference to any act, deed, or transaction
6 of a Defendant, the allegation means that the Defendant engaged in the act, deed, or transaction by or
7 through its officers, directors, agents, employees, or representatives while they were actively
8 engaged in the management, direction, control or transaction of the Defendant’s business or affairs.

9 **C. Co-Conspirators**

10 108. Various persons, firms, corporations, organizations and other business entities, some
11 unknown and others known, have participated as unnamed co-conspirators in the violations alleged
12 herein, including the NCAA’s member-schools and other NCAA Division I athletic conferences not
13 named as defendants in this Complaint. Representatives of those schools and conferences serve on
14 NCAA committees which promulgate rule changes. Representatives of those schools and
15 conferences voted to adopt the rules prohibiting NIL compensation and compensation for athletic
16 services, as well as the rules limiting the number of athletic scholarships available to college athletes,
17 and thus agreed to impose the restraints on trade described herein. All Division I schools and
18 conferences continue to benefit from those restraints of trade by virtue of their agreement to abide by
19 the restraints.

20 **IV. THE ILLEGAL AGREEMENTS TO RESTRAIN COMPETITION**

21 109. Defendants’ anticompetitive agreements are not secret or disputable. They are a
22 matter of public record, codified in the NCAA Division I Manual (the NCAA’s rulebook) and the
23 rulebooks of each Conference Defendant. They are proposed, drafted, voted upon, and agreed to by
24 the NCAA members—including the Conference Defendants—that compete for the services of
25 college athletes in the various relevant labor markets. These anticompetitive rules are also strictly
26 enforced, so that the competing NCAA member institutions have no choice but to comply with them
27 or face severe cartel penalties.

110. Plaintiffs bring this suit to challenge and seek damages caused by the NCAA and the Conference Defendants' rules that prohibit, cap, or otherwise limit the compensation that Division I student-athletes may receive from schools or conferences including for the use of their names, images, likenesses, and athletic reputations in the manners discussed in this Complaint, as well as compensation for their athletic services. Plaintiffs also challenge the NCAA and Conference Defendants' rules limiting Division I athletes' ability to enter into NIL transactions with third parties. Further, Plaintiffs challenge the NCAA and Conference Defendants' rules limiting the number of athletic scholarships available to student-athletes.

111. Article 4 of the NCAA Constitution ("Rules, Compliance and Accountability") provides: "Each member institution . . . shall hold itself accountable to support and comply with the rules and principles approved by the membership. Further, each school shall ensure that its staff, student-athletes, and other individuals and groups representing the institution's athletics interests comply with applicable rules (institutional, conference, divisional and Association-wide) in the conduct of the institution's intercollegiate athletics program."

112. The NCAA rules, and each Conference Defendant's rules, that prohibit or otherwise limit the compensation that players may receive for their athletic services are illegal cartel agreements. The NCAA rules, and each Conference Defendant's rules, that limit the scholarships and roster spots available to players for their athletic services are illegal cartel agreements. These rules include, but are not limited to NCAA Bylaws 12.01.4, 12.1.2, 12.1.2.1, 12.4.1, 12.4.1.1, 12.4.2.3, 12.4.4, 12.5.2.1, 12.5.2.2, 15.02.2, 15.02.6, 15.1, 15.5.1, 15.5.2, 15.5.3, 15.5.4, 15.5.5, 15.5.6, 16.02.3, 16.1.4, 16.11.2 (individually, and as interpreted and applied in conjunction with each other).

113. Any Division I school that deviates from NCAA rules may be subject to severe sanctions. Potential punishments for rules violations include a complete ban on participation (the "death penalty"), as well as a reduction in the number of grants-in-aid a school can offer, or even expulsion from the NCAA.

A. NCAA NIL-Specific Compensation Rules

114. The NCAA's rules in force during most of the Class Period prohibited student-athletes from endorsing any commercial product or service while they are in school, regardless of

whether or not they receive any compensation for doing so. NCAA Bylaw 12.5.2.1 (“Advertisements and Promotions After Becoming a Student-Athlete”) states:

After becoming a student-athlete, an individual shall not be eligible for participation in intercollegiate athletics if the individual:

- (a) Accepts any remuneration for or permits the use of his or her name or picture to advertise, recommend or promote directly the sale or use of a commercial product or service of any kind; or
- (b) Receives remuneration for endorsing a commercial product or service through the individual’s use of such product or service.

115. The NCAA also burdens student-athletes with the responsibility of policing any commercial uses of their NILs that take place without their knowledge or permission. NCAA Bylaw 12.5.2.2 (“Use of a Student-Athlete’s Name or Picture Without Knowledge or Permission”) states:

If a student-athlete’s name or picture appears on commercial items (e.g., T-shirts, sweatshirts, serving trays, playing cards, posters) or is used to promote a commercial product sold by an individual or agency without the student-athlete’s knowledge or permission, the student-athlete (or the institution acting on behalf of the student-athlete) is required to take steps to stop such an activity in order to retain his or her eligibility for intercollegiate athletics.

116. NCAA rules further restrict student-athletes’ outside employment and the compensation that they may receive from third-party employers. The NCAA rules *allow* athletes to obtain outside employment while attending college and participating in NCAA sports. And they even permit multi-sport athletes to retain their college eligibility in one sport while simultaneously competing (and receiving a salary) as a professional in a different sport.¹⁸ However, the NCAA rules restrict virtually all NIL-related opportunities and compensation that athletes can obtain through outside employment.

117. While a student-athlete may generally earn money from any “on- or off-campus employment” unrelated to his or her athletic ability, NCAA Bylaw 12.4.1 (“Criteria Governing Compensation to Student-Athletes”) limits the remuneration that athletes can receive from outside employers to “a rate commensurate with the going rate in that locality for similar services.” And

¹⁸ NCAA Bylaw 12.1.3.

1 NCAA Bylaw 12.4.1.1 (“Athletics Reputation”) specifically prohibits athletes from receiving “any
2 remuneration for value or utility that the student-athlete may have for the employer because of the
3 publicity, reputation, fame or personal following that he or she has obtained because of athletics
4 ability.” While, as of July 1, 2021, the NCAA temporarily suspended enforcement of this rule, it has
5 not been removed from the NCAA’s bylaws. Moreover, the interim policy continues to prohibit
6 schools from licensing athletes’ NILs and bundling those rights to feature the athletes as part of the
7 school’s licensing arrangements.

8 118. NCAA Bylaw 12.4.2.3 (“Athletics Equipment Sales”) provides that “a student-athlete
9 may not be employed to sell equipment related to the student-athlete’s sport if his or her name,
10 picture or athletics reputation is used to advertise or promote the product, the job or the employer. If
11 the student-athlete’s name, picture or athletics reputation is not used for advertising or promotion, the
12 student-athlete may be employed in a legitimate sales position, provided he or she is reimbursed at
13 an hourly rate or set salary in the same manner as any nonathlete salesperson.” While, as of July 1,
14 2021, the NCAA has temporarily suspended enforcement of this rule, it has not been removed from
15 the NCAA’s bylaws. And again, the interim policy continues to prohibit schools from licensing
16 athletes’ NILs and bundling those rights to feature the athletes as part of the school’s licensing
17 arrangements.

18 119. The NCAA’s rules also restrict the NIL-related compensation that athletes can obtain
19 through self-employment and personal business ventures. Bylaw 12.4.4 (“Self-Employment”) states
20 that “a student-athlete may establish his or her own business, provided the student-athlete’s name,
21 photograph, appearance or athletics reputation are not used to promote the business.” While, as of
22 July 1, 2021, the NCAA has temporarily suspended enforcement of this rule, it has not been removed
23 from the NCAA’s bylaws.

24 120. The NCAA, effective July 1, 2021, adopted an “interim” NIL policy to suspend
25 enforcement of some aspects of its NIL rules. But the NIL restraints at issue have not been
26 withdrawn or removed from the NCAA rules, and the NCAA remains free to change its NIL rules at
27 any time in the future at its discretion and/or to revert back to full enforcement of all of the NIL
28 rules, and it has stated that “the current legal and legislative landscape prevents a permanent solution

at this time.”¹⁹ Moreover, even under its interim policy, the NCAA has not suspended enforcement of some of the most restrictive aspects of its NIL rules. For example, the NCAA states that under its interim policy, NIL compensation still cannot be “contingent upon enrollment at a particular school” or based on “athletic participation or performance.”²⁰ That is an onerous restriction, as a sponsor could otherwise have language in an endorsement deal that ties payment to being actively playing the sport, achieving an athletic accomplishment (such as playing in or winning a Bowl game) or playing the sport at a particular school. A sponsor may refuse to enter into an endorsement deal if it is not able to put this language in a contract. Furthermore, “Institutions providing compensation in exchange for the use of a student-athlete’s name, image or likeness” remains prohibited under the interim policy.²¹

B. NCAA Compensation Rules

121. Article 12 of the NCAA Bylaws (“Amateurism and Athletics Eligibility”) is the foundation of Defendants’ unlawful agreements to fix the amount of compensation that may be paid to student athletes for their athletic services. Bylaw 12.1.2 provides:

A [student athlete] loses amateur status and thus shall not be eligible for intercollegiate competition in a particular sport if the individual: (a) [u]ses athletics skill (directly or indirectly) for pay in any form in that sport; [or] (b) [a]ccepts a promise of pay even if such pay is to be received following the completion of intercollegiate athletics participation

122. Bylaw 12.1.2.1 then includes a non-exhaustive, two-page list of “Prohibited Forms of Pay,” including any “direct or indirect salary, gratuity or comparable compensation”; any “division or split of surplus (bonuses, game receipts, etc.);” any “[e]ducational expenses not permitted by the governing legislation of this Association [*i.e.*, the NCAA]”; and any “[p]referential treatment, benefits or services.” The NCAA rules then continue with nearly two pages of “Exceptions to

²¹ *Id.*

Amateurism Rule.” Bylaw 12.1.2.4, *et seq.* Unless an exception applies, the NCAA Bylaws categorically prohibit conferences and schools from providing any form of pay to college athletes.

123. Article 15 of the NCAA Bylaws (“Financial Aid”) restricts the amount and type of, and method by which, schools can provide financial aid to athletes. Financial aid “is not considered to be pay or the promise of pay for athletics skill, provided it does not exceed the financial aid limitations set by [NCAA’s] membership.” *See* Bylaw 12.01.4. Bylaw 15.1 allows athletes to receive financial aid “based on athletics ability” “up to the value of a full grant-in-aid, plus any other financial aid up to the cost of attendance.” “Full Grant-in-Aid” is “financial aid that consists of tuition and fees, room and board, books and other expenses related to attendance at the institution up to the cost of attendance.” NCAA Bylaw 15.02.6. “Cost of attendance” (or COA) is the “amount calculated by an institutional financial aid office, using federal regulations, that includes the total cost of tuition and fees, living expenses, books and supplies, transportation, and other expenses related to attendance at the institution.” NCAA Bylaw 15.02.2. If an athlete receives financial aid in excess of the COA, they “shall not be eligible to participate in intercollegiate athletics.” NCAA Bylaw 15.1.

124. Article 16 (“Awards, Benefits and Expenses for Enrolled Student-Athletes”) similarly prohibits NCAA members from providing benefits to athletes based on their athletic abilities. Bylaw 16.11.2 provides, “The student-athlete shall not receive any extra benefit.” “Extra benefit” is defined as “any special arrangement by an institutional employee or representative of the institution’s athletics interests to provide the student-athlete or the student-athlete’s family members or friends with a benefit not expressly authorized by NCAA legislation.” *See* NCAA Bylaw 16.11.2; *see also* NCAA Bylaw 16.02.3.

C. NCAA Scholarship Limits

125. The NCAA bylaws artificially restrain the athletic scholarships available for college-athlete labor services by setting maximum numbers or amounts of scholarships that can be provided in each sport. For example, NCAA Bylaw 15.5.2 states that “[a]n institution shall be limited in any academic year to the total number of counters (head count) in ... Women’s Gymnastics 12[, Women’s Tennis 8[, and] Women’s Volleyball 12.” This means that each institution can provide

athletic scholarships (in any amount up to the NCAA cap) to this maximum number of athletes set for each sport. Similarly, the NCAA sets maximum numbers of scholarship recipients at 85 for FBS football (NCAA Bylaw 15.5.6.1), 13 each for men’s and women’s basketball (NCAA Bylaws 15.5.5.1 and 15.5.5.2), and a maximum value of 11.7 scholarships to a maximum of 27 athletes for baseball (NCAA Bylaw 15.5.4.1).

126. The NCAA Bylaws 15.5.3.1.1 (“Maximum Equivalency Limits, Men’s Sports”) and 15.5.3.1.2 (“Maximum Equivalency Limits, Women’s Sports”) also “limit [] the value (equivalency) of financial aid awards that an institution may provide in any academic year” in the other NCAA sports.

D. Conference Rules

127. As NCAA members, the Conference Defendants have agreed to the NCAA rules restricting NIL and other types of compensation as well as the number of scholarships. To that end, Conference Defendants have also adopted their own rules (which may be more restrictive but not more permissive than the NCAA’s rules) that adopt NCAA rules and otherwise restrict the monies and benefits that may be provided to student-athletes, including limitations on the number of scholarships.

128. Examples of the Conference Defendants’ anticompetitive rules include:

- a. ACC Constitution, Article 1.2.1 (“General Purpose”): “The Conference aims to . . . [c]oordinate and foster compliance with Conference and NCAA rules.”²²
- b. ACC Manual, Bylaw 2.2 (“NCAA Regulations”): “All [ACC] Members are bound by NCAA rules and regulations, unless Conference rules are more restrictive.”²³
- c. Big Ten Conference Handbook, Rule 14.01.3 (“Compliance with NCAA and Conference Legislation”): “The Constitution and Bylaws of the National Collegiate Athletic Association shall govern all matters of student-athlete

²² ACC Manual, 2020–21, <https://virginiatech.sportswar.com/wp-content/uploads/sites/15/2022/08/2020-21-ACC-Manual-2020-9-17-2.pdf> (last visited July 10, 2024).

²³ *Id.*

eligibility except to the extent that such rules are modified by the Conference Rules and Agreements.”²⁴

- d. Big 12 Bylaw 1.2.3 (“Adherence to NCAA Rules”): “All Members of the Conference are committed to complying with NCAA rules and policies. . . . In addition, the conduct of Members shall be fully committed to compliance with the rules and regulations of the NCAA and of the Conference.”²⁵
- e. Big 12 Bylaw 6.1 (“Eligibility”): “A student-athlete must comply with appropriate minimum requirements of the NCAA and the Conference in order to be eligible for athletically related aid, practice, and/or competition in any intercollegiate sport.”²⁶
- f. Big 12 Bylaw 6.4.3 (“Financial Aid Reports”): “Each institution shall comply with all financial aid legislation of the NCAA and the Conference.”²⁷
- g. Pac-12 Bylaw 4-2 (“Application of NCAA Legislation”): “The Conference is a member of the NCAA, therefore, all member institutions are bound by NCAA rules and regulations unless the Conference rules are more demanding.”²⁸
- h. Pac-12 Executive Regulation 3-1 (“NCAA Rules”): “The rules of the National Collegiate Athletic Association shall govern all matters concerning financial aid to student-athletes except to the extent that the CEO Group modifies such rules to be applied on a conference wide basis.”²⁹

- i. SEC Constitution, Article 5.01.1 (“Governance”): “The Conference shall be governed by the Constitution, Bylaws, and other rules, regulations, and legislation of the Conference and the NCAA.”³⁰
- j. SEC Bylaws 15.01.1 (“Institutional Financial Aid Permitted”): “Any scholarship or financial aid to a student-athlete must be awarded in accordance with all NCAA and Conference regulations.”³¹

V. RELEVANT MARKETS

129. The relevant markets are the nationwide markets for the labor of NCAA Division I college athletes in the various sports in which they compete. In these labor markets, current and prospective athletes compete to participate on the various Division I athletic teams. NCAA Division I member institutions compete to recruit and retain the best players by offering unique bundles of goods and services including scholarships to cover the cost of attendance, tutoring, and academic support services, as well as access to state-of-the-art athletic training facilities, premier coaching, medical treatment, and opportunities to compete at the highest level of college sports, often in front of large crowds and television audiences. In exchange, student-athletes must provide their athletic services and acquiesce in the use of their NILs by the NCAA and its members for commercial and promotional purposes without compensation. They also implicitly agree to pay any costs of attending college and participating in intercollegiate athletics that are not covered by their scholarships.

130. All of the colleges and universities in Division I, which the NCAA itself defines as the highest level of competition in college sports, compete in the relevant labor markets. This includes all colleges and universities that are members of the Power Five Conference Defendants, as well as the schools and conferences that collude with the Defendants through NCAA rules to fix the maximum compensation to athletes in exchange for the commercial use of their NILs and their athletic services while working on Division I teams. These colleges and universities also fix the

³⁰ Southeastern Conference Constitution and Bylaws, 2023–2024, <https://a.espncdn.com/sec/media/2023/2023-24%20SEC%20Bylaws.pdf> (last visited July 10, 2024).

³¹ *Id.*

1 maximum number of athletic scholarships available to student-athletes at each college or university
2 through NCAA rules.

3 131. The NCAA and its members have the ability to control price and exclude competition
4 in these labor markets. All NCAA members have agreed to utilize and abide by the NCAA's bylaws,
5 including the provisions detailed herein. The NCAA and its members have the power to exclude
6 from these markets any member who is found to violate its rules.

7 132. The NCAA imposes a wide variety of restraints on student-athletes as a condition for
8 their being able to play for a Division I team. For example, athletes may not receive compensation
9 beyond educational expenses approved by the NCAA; they must meet minimum requirements for
10 educational progress; and they are strictly limited in their ability to receive compensation for any
11 services that might be understood to reflect on their athletic ability or reputation. If student-athletes
12 had the opportunity to receive a college education and compete at an elite level of intercollegiate
13 competition without these restrictions, many would choose to do so. The fact that they agree to these
14 conditions demonstrates the market power of the NCAA and its members in each of the relevant
15 labor markets for Division I athletes.

16 133. There are no reasonable substitutes for the educational and athletic opportunities
17 offered by NCAA Division I schools in the relevant labor markets. No other division or association
18 of collegiate athletics provides the same combination of goods and services offered in Division I.
19 Schools in NCAA Division II, for example, provide fewer athletic scholarships than Division I
20 schools, which results in a lower level of athletic competition, and much lower notoriety. Schools in
21 NCAA Division III do not provide any athletic scholarships at all and a lower level of competition.
22 The National Intercollegiate Athletic Association (NAIA), National Junior College Athletic
23 Association (NCCAA), and United States Collegiate Athletic Association (USCAA) likewise
24 provide less scholarship money and offer a much lower level of competition. And schools in these
25 other divisions and associations are often smaller than Division I schools, spend far less resources on
26 athletics, and many do not even provide the opportunity to attend a four-year college. Nor are
27 equivalent labor market opportunities offered by the professional leagues. Indeed, neither the
28 National Football League (NFL) nor the National Basketball Association (NBA) permits players to

1 enter the league immediately after high school. And, although some minor leagues and professional
2 leagues in other sports do permit athletes to compete immediately after high school, recruits rarely
3 forego opportunities to play Division I sports in order to play professionally. The qualitative
4 differences between the opportunities offered in NCAA Division I, including the opportunity to
5 receive a college education, and those offered by other sports leagues illustrate that Division I
6 schools operate in distinct labor markets for their athletes.

7 134. Because Division I schools are the only suppliers in these relevant labor markets, they
8 have the power, when acting in concert through the NCAA and its conferences, to fix the quantity
9 and price of labor. They have chosen to exercise this power by enacting collectively agreed-to,
10 horizontal rules that strictly limit the compensation and terms of employment for Division I athletes.
11 If any school seeks to depart from these fixed employment terms, that school may be subject to
12 sanctions or expulsion by the NCAA.

13 135. As discussed above, effective July 1, 2021, the NCAA suspended the enforcement of
14 rules prohibiting NIL compensation from third parties, but only on an interim basis. That has led to
15 an explosion of NIL compensation currently being provided to student-athletes. The fact that this
16 occurred only after the NCAA stated that it was temporarily suspending enforcement of some of the
17 NIL restraints is further evidence of the NCAA's market power, and of the anticompetitive impact of
18 their use of this market power to eliminate an entire category of welfare-enhancing commercial
19 activity.

20 136. By contrast, because the NCAA has not suspended the enforcement of its rules
21 barring schools and conferences from providing compensation in addition to the fixed financial-aid
22 amount allowed, including any NIL compensation to student-athletes, no NCAA member institution
23 has begun to directly provide NIL compensation to student-athletes. This further demonstrates the
24 monopsony power of the NCAA.

25 137. The agreement to abide by the NCAA's compensation and scholarship maximum
26 rules is anticompetitive because, among other things, it undermines schools' efforts to compete
27 freely for the best college recruits.
28

1 138. Absent these nationwide restraints, there would have been free and vigorous
2 competition for the services of college athletes with schools or conferences offering more
3 scholarships and compensation for athletic services and the use of NILs.

4 139. Again, the events since July 1 have proven this to be true, as schools and conferences
5 have permitted student-athletes to commercialize their NILs once the NCAA restraints were
6 suspended, and the quantity of output has exploded, resulting in higher compensation to a large
7 number of athletes who had previously been subject to the pre-July 1, 2021 cap. To date, Plaintiffs
8 are unaware of any Division I school or conference that has chosen to prohibit NIL compensation
9 that is currently permitted by the NCAA and applicable law. But no NIL compensation has been
10 provided directly by NCAA institutions to athletes, as the NCAA has not suspended its rules barring
11 such NIL compensation by its members. If these NCAA rules were not in effect, such compensation
12 by the schools, including for group licensing rights for broadcasts and other purposes, would be
13 provided.

14 140. The harm to student-athletes from the NCAA's restraints is obvious. Absent the
15 challenged restraints, more student-athletes would obtain scholarships, and many student-athletes
16 would receive additional compensation from conferences or schools for the use of their NILs and
17 providing athletic services. These young men and women—often from socio-economically
18 disadvantaged backgrounds—have been deprived of the economic benefit the market would
19 otherwise pay. The adverse impact of this harm is exacerbated by the fact that only a small
20 percentage of student-athletes will ever play professionally. The injuries that Plaintiffs and the class
21 members are incurring and will continue to incur will not be fully compensable by monetary
22 damages. This is particularly true due to the short length of NCAA careers, and the challenges in
23 estimating and proving the total amount of damages suffered by Plaintiffs as a result of Defendants'
24 unlawful conduct.

VI. FACTUAL ALLEGATIONS

A. An Overview of the NCAA

1. History and Purpose

141. Former NCAA Executive Director Walter Byers, in his 1995 book, *Unsportsmanlike Conduct: Exploiting College Athletes*, wrote: “[t]he first intercollegiate competition in the United States was conceived and organized by students in the mid-1840s. By the turn of the century, eastern colleges were competing in some 19 sports. This all came about through student initiative and effort. The students set in place the underlying structure for college sports. Today, professional coaches, professional managers and money-minded presidents have total control. It is time to give back to the students who play sports the freedoms they deserve. At a minimum, they are entitled to freedoms enjoyed by their fellow students.”

142. The NCAA “was founded in 1906 to protect young people from the dangerous and exploitative athletics practices of the time.”³² According to the NCAA, “[t]he rugged nature of early-day football, typified by mass formations and gang tackling, resulted in numerous injuries and deaths,” prompting President Theodore Roosevelt to convene two White House conferences with college athletics leaders to encourage safety reforms. As a result of several subsequent meetings of colleges and universities to initiate changes in football playing rules to protect the safety of student-athletes, on March 31, 1906, 62 institutions became charter members of the Intercollegiate Athletic Association of the United States (IAAUS). The IAAUS took its present name, the NCAA, in 1910.

143. For several years, the NCAA was a discussion group and rules-making body, but in 1921 the first NCAA national championship was conducted: the National Collegiate Track and Field Championships. Gradually, more rules committees were formed and more championships were created, including a basketball championship in 1939.

144. According to the NCAA, “[a]s college athletics grew, the scope of the nation’s athletics programs diverged, forcing the NCAA to create a structure that recognized varying levels of

³² Dan Treadway, *Why Does the NCAA Exist?* HuffPost.com, Dec. 6, 2017, https://www.huffpost.com/entry/johnny-manziel-ncaa-eligibility_b_3020985 (last visited July 25, 2021).

1 emphasis. In 1973, the Association’s membership was divided into three legislative and competitive
 2 divisions—I, II and III. Five years later, Division I members voted to create subdivisions I-A and
 3 I-AA (renamed the Football Bowl Subdivision and the Football Championship Subdivision in 2007)
 4 in football.” The NCAA “began administering women’s athletics programs in 1980 when Divisions
 5 II and III established 10 championships for 1981-82. A year later, the historic 75th Convention
 6 adopted an extensive governance plan to include women’s athletics programs, services and
 7 representation. The delegates expanded the women’s championships program with the addition of 19
 8 events, many of them Division I and National Collegiate (all division) championships.”

9 145. Article 1 of the NCAA Constitution states that the NCAA’s basic purpose is “to
 10 maintain intercollegiate athletics as an integral part of the educational program and the athlete as an
 11 integral part of the student body and, by so doing, retain a clear line of demarcation between
 12 intercollegiate athletics and professional sports.”

13 146. The NCAA proclaims it is “dedicated to the well-being and lifelong success of
 14 college athletes,” and “united around one goal: creating opportunities for college athletes.”³³

15 **2. Governance Structure**

16 147. The NCAA describes itself as an “unincorporated not-for-profit educational
 17 organization . . . through which the colleges and universities of the nation speak and act on athletic
 18 matters at the national level.”³⁴ The NCAA proclaims it is “a voluntary association of more than
 19 1,200 institutions, conferences, and organizations devoted to the sound administration of
 20 intercollegiate athletics in all its phases,” and that “[t]hrough the NCAA, its members consider any
 21 athletics issue that crosses regional or conference lines and is national in character.” According to its
 22 IRS tax returns, the NCAA’s “active member institutions and voting conferences are the ultimate
 23 voice in all Association decisions.”³⁵

26 ³³ 2018 IRS Form 990.

27 ³⁴ NCAA Consolidated Financial Statements, FY 2018 & 2019.

28 ³⁵ 2018 IRS Form 990.

1 148. The NCAA “oversees 89 championships in 23 sports,” and “more than 400,000
2 college athletes competing in three divisions at over 1,000 colleges and universities.” The NCAA
3 website further states:

4 Each member school is able to choose a level of competition that best fits
5 its mission. Competition is offered in Division I (the largest programs that
6 provide the most athletically related financial aid for student-athletes),
Division II (limited financial aid) and Division III (no athletically related
financial aid).

7 There are 1,066 active member schools in the NCAA membership—340 in
8 Division I, 290 in Division II and 436 in Division III. The NCAA also
9 contains 95 member conferences in all three divisions. Overall
membership—counting schools, conferences and related associations—is
1,273.

10 Division I is subdivided based on football affiliation. A total of 120 schools
11 are members of the Football Bowl Subdivision (FBS). That subdivision is
12 characterized by postseason play outside the NCAA structure and also by
13 higher financial aid allocations. The second Division I subdivision is the
Football Championship Subdivision, which contains 122 schools that
participate in the NCAA’s Division I Football Championship. The
remaining 98 Division I schools do not sponsor football.

14 149. According to the NCAA, “Division I offers three classes of membership: active,
15 conference and affiliated.” NCAA Constitution Article 3.02.3, titled “Membership Categories,”
16 provides:

17 **3.02.3.1 Active Member.** An active member is a four-year college or
18 university that is accredited by the appropriate regional accrediting agency
and duly elected to active membership under the provisions of this article
19 (see Constitution 3.2.3). Active members have the right to compete in
NCAA championships, to vote on legislation and other issues before the
20 Association, and to enjoy other privileges of membership designated in the
constitution and bylaws of the Association.

21 **3.02.3.2 Member Conference.** A member conference is a group of
22 colleges and/or universities that conducts competition among its members
and determines a conference champion in one or more sports (in which the
23 NCAA conducts championships or for which it is responsible for providing
playing rules for intercollegiate competition), duly elected to conference
24 membership under the provisions of this article (see Constitution 3.3.3). A
member conference is entitled to all of the privileges of active members
25 except the right to compete in NCAA championships (see Constitution
3.3.2). Only those conferences that meet specific criteria as competitive and
26 legislative bodies (see Constitution 3.02.1 and 3.02.2) and minimum
standards related to size and division status are permitted to vote on
27 legislation or other issues before the Association.
28

1 150. The NCAA’s website explains that, “[e]ach division creates its own rules governing
2 personnel, amateurism, recruiting, eligibility, benefits, financial aid, and playing and practice
3 seasons—consistent with the overall governing principles of the Association. Every program must
4 affiliate its core program with one of the three divisions.”

5 151. The NCAA “operates through a governance structure, which empowers each division
6 to guide and enhance their ongoing division-specific activities.”³⁶ In Division I, the legislative
7 system is based on conference representation and an eighteen-member Board of Directors that
8 approves legislation. The governance structure also includes an Executive Committee composed of
9 sixteen chief executive officers that oversees association-wide issues and is charged with ensuring
10 that each division operates consistently with the basic purposes, fundamental policies, and general
11 principles of the NCAA.

12 **3. Bylaws and Enforcement**

13 152. The NCAA and its members govern themselves through the NCAA manual, which is
14 promulgated yearly and updated quarterly. The manual contains, among other things, the NCAA’s
15 Constitution and operating Bylaws, which includes nearly five hundred pages of regulations
16 governing all aspects of college sports.

17 153. The Constitution and Bylaws were adopted—and may be amended—by votes of the
18 NCAA membership. Article 5.2.2 (“Operating Bylaws”) states that “[e]ach division may adopt
19 legislation to be included in the operating bylaws of the Association, which provide rules and
20 regulations not inconsistent with the provisions of the constitution and which shall include, but not
21 be limited to, the following particulars: (a) The administration of intercollegiate athletics by
22 members of the Association; (b) The establishment and control of NCAA championships (games,
23 matches, meets and tournaments) and other athletics events sponsored or sanctioned by the
24 Association; (c) The procedures for administering and enforcing the provisions of the constitution
25 and bylaws; and (d) The adoption of rules of play and competition in the various sports, and the
26 delegation of authority in connection with such subjects to individuals, officers or committees.”

27
28 ³⁶ NCAA Consolidated Financial Statements, August 31, 2019 and 2018.

1 154. The manual also contains extensive provisions requiring member schools to follow
2 NCAA rules and providing for discipline of members that fail to do so. For example, Article 1.3.2
3 (“Obligations of Member Institutions”) states that “[l]egislation governing the conduct of
4 intercollegiate athletics programs of member institutions shall apply to basic athletics issues such as
5 admissions, financial aid, eligibility and recruiting. Member institutions shall be obligated to apply
6 and enforce this legislation” Article 2.8.1 (“Responsibility of Institution”) reiterates that “[e]ach
7 institution shall comply with all applicable rules and regulations of the Association in the conduct of
8 its intercollegiate athletics programs,” and that “[m]embers of an institution’s staff, student-athletes,
9 and other individuals and groups representing the institution’s athletics interests shall comply with
10 the applicable Association rules, and the member institution shall be responsible for such
11 compliance.”

12 155. Article 3.1 (“Eligibility for Membership”) reinforces that “institutions or
13 organizations must accept and observe the principles set forth in the constitution and bylaws of the
14 Association.” And Article 3.2.1.2 (“Compliance with Association Rules”) mandates that each
15 institution “shall administer its athletics programs in accordance with the constitution, bylaws and
16 other legislation of the Association.”

17 156. Similarly, Article 3.2.4 (“Conditions and Obligations of Membership”) states that
18 “[a]n active member institution agrees to administer its athletics program in accordance with the
19 constitution, bylaws and other legislation of the Association.” And, pursuant to Article 3.2.4.4
20 (“Certification of Eligibility/Declaration of Ineligibility”), every NCAA school “is responsible for
21 certifying the eligibility of student-athletes under the terms of the constitution, bylaws or other
22 legislation of the Association” and institutions are “obligated immediately to apply all applicable
23 rules and withhold ineligible student-athletes from all intercollegiate competition.” In other words,
24 the NCAA mandates a collective boycott by all members of any athlete found to have deviated from
25 the price-fixing activity alleged in this Complaint.

26 157. To reinforce its rules, the NCAA goes even further. For example, Article 3.2.4.11
27 (“Discipline of Member”) states that, “active members shall refrain from athletics competition with
28 designated institutions under the provisions of the Association’s enforcement procedures.” To put it

1 another way, the NCAA mandates a collective boycott by all members of any school found to have
2 deviated from the price-fixing activity alleged in this Complaint.

3 158. Article 2.8.3 (“Penalty for Noncompliance”) states that “[a]n institution found to have
4 violated the Association’s rules shall be subject to such disciplinary and corrective actions as may be
5 determined by the Association.” Article 3.2.5.1 (“Termination or Suspension”) states that “[t]he
6 membership of any active member ... failing to meet the conditions and obligations of membership
7 may be suspended, terminated or otherwise disciplined.” Article 3.01.4 (“Termination or Suspension
8 of Membership”) states that “[a]ll rights and privileges of a member shall cease immediately upon
9 termination or suspension of its membership.” And, Article 3.2.5.1.1 (“Cessation of Rights and
10 Privileges”) states that “[a]ll rights and privileges of the member shall cease upon any termination or
11 suspension of active membership.”

12 159. Conferences also enforce the NCAA’s rules. For example, the Pac-12’s 2018-19
13 Handbook states that “[t]he Conference is formed for the following purposes: a. To provide its
14 members with a jointly governed body for sponsoring, supervising and regulating intercollegiate
15 athletics as a member of the National Collegiate Athletics Association (‘NCAA’) in accordance with
16 the principles, policies, constitution and bylaws of the NCAA....” The Handbook continues that
17 “[t]he members of the Conference value: ... Compliance with Conference and NCAA rules” and that
18 “[t]he Conference may place a member on probation or suspension, or terminate its membership, by
19 vote of at least three-fourths of all of the members of the CEO Group eligible to vote on the matter,
20 for one or more of the following reasons: ... Violating rules and regulations of the NCAA, or
21 becoming ineligible for active membership in Division I of the NCAA, by a written determination of
22 the NCAA; ... Such disciplinary action may also include the assessment of financial penalties.” It
23 continues that “[t]he Conference is a member of the NCAA, therefore, all member institutions are
24 bound by NCAA rules and regulations unless the Conference rules are more demanding,” and “[t]he
25 rules of the National Collegiate Athletic Association shall govern all matters concerning financial aid
26 to student-athletes except to the extent that such rules are modified by the CEO Group.” All of the
27 other Conference Defendants have similar rules agreeing to abide by and enforce NCAA bylaws.
28

160. In addition to controlling its members, the NCAA also regulates college athletes. Bylaw 14.01.3 (“Compliance With Other NCAA and Conference Legislation”) mandates that, “to be eligible to represent an institution in intercollegiate athletics competition, a student-athlete shall be in compliance with all applicable provisions of the constitution and bylaws of the Association...” Bylaw 12.7.2 (“Student-Athlete Statement”) states that each year a college athlete “shall sign a statement in a form prescribed by the Legislative Council ... related to ... eligibility ... financial aid, amateur status ... [f]ailure to complete and sign the statement shall result in the student-athlete’s ineligibility for participation in all intercollegiate competition.”

B. The commercial nature of Division I sports

161. The rapid and largely unconstrained escalation of commercialization in college sports makes it increasingly difficult to justify the ever-expanding divide between student-athletes, who have been compensated only with restrictive, in-kind benefits or expense reimbursement, and the business of the sports they play. This divide has eroded the value of the education that athletes receive and gives rise to high-profile violations of NCAA rules that highlight the pervasive influence of money in college sports and the lack of commitment to academics.

162. In a January 2020 interview with ESPN, former NCAA Vice President of Championships, Mark Lewis explained the highly commercialized nature of big-time college sports: “The priority is to monetize the sport, that’s taken precedence over everything else. If that’s the model—and there’s nothing wrong with that—then you can’t expect the players to live by the same set of rules [as they did in the past]. To me, it’s just a question of fairness.” Lewis continued, “If you go back 30 or 40 years to all the ways pro sports tried to be financially successful and compared that to college sports, you didn’t check all those boxes. There were legitimate differences ... Then, you could say the focus was an academic-oriented situation. But in this drive for revenue now, the boxes line up the same. Colleges are doing everything that pro sports leagues are doing to make money. So how come you’re treating the participants radically different? You can’t justify it.”³⁷

³⁷ Dan Murphy, *Former NCAA executive Mark Lewis supports college players earning money*, ESPN.com, Jan. 21, 2020, https://www.espn.com/college-sports/story/_/id/28530364/former-ncaa-executive-mark-lewis-supports-college-players-earning-money (last visited July 25, 2021).

1 163. The money generated by the college sports enterprise is staggering. In 2019, the
 2 NCAA reported total revenues of \$1,118,495,545.³⁸ And it is important to note that the revenues
 3 reported *by the NCAA* are only a fraction of the total revenues brought in by Division I college sports
 4 each year. And, whether through sponsorship arrangements, ticket sales, television contracts, apparel
 5 deals, merchandise sales, or increasing student fees, the revenue streams for conferences and
 6 individual athletics programs are varied and robust.

7 164. College sports have also proved to be highly profitable for corporate interests that find
 8 every way imaginable to market and exploit student-athletes. While corporations have fueled the
 9 massive growth of the college sports industry, their profit margins have simultaneously expanded off
 10 the backs of “amateur” college athletes.

11 165. For example, television networks have capitalized on the immense profitability of the
 12 college sports machine through substantial broadcasting deals with the NCAA and its members. In
 13 2016, CBS Sports and Turner Broadcasting signed an eight-year, \$8.8 billion extension with the
 14 NCAA for broadcasting rights to the March Madness basketball tournament. In the same year, the
 15 Big Ten conference signed a six-year deal with Fox, ESPN, and CBS worth \$2.64 billion.³⁹ That
 16 contract mirrors similar deals that the other Power Five conferences and schools have made with
 17 broadcasters to launch their own channels. In 2011, for example, the University of Texas signed a
 18 deal with ESPN worth \$300 million over 20 years that created the Longhorn Network.⁴⁰

19 166. Every television deal, whether with the NCAA, its conferences, or individual
 20 programs, nets broadcasters substantial advertising revenues. With championship game ads going for
 21 \$1.5 million each, corporate spending on the March Madness tournament now rivals that of the
 22 Super Bowl. It is estimated that CBS and Turner took in \$1 billion from advertisements during the
 23

24 ³⁸ NCAA Consolidated Financial Statements, August 31, 2019 and 2018.

25 ³⁹ Lev Facher, *Report: Big Ten getting \$2.64 billion in new TV deal*, Indystar.com, June 20,
 26 2016, <https://www.indystar.com/story/sports/college/2016/06/20/report-espn-pay-more-than-1-billion-big-ten-footballgames/86133418/> (last visited July 25, 2021).

27 ⁴⁰ Spencer Hall, *The Longhorn Network and ESPN Sign Texas-Sized Deal (Yeeshaw!)*,
 28 SBNation.com, Jan. 19, 2011, <https://www.sbnation.com/ncaa-football/2011/1/19/1944110/texas-longhorn-network-espn-sign-deal> (last visited July 25, 2021).

1 2018 tournament.⁴¹ In 2019, the University of Virginia’s overtime victory over Texas Tech drew
 2 19.6 million viewers and that game alone was reported to have generated \$114 million in ad
 3 spending.⁴² Despite the fact that student-athletes contribute a substantial portion of the value that
 4 supports the massive revenues generated in these deals (through both their athletic performances and
 5 the use of their NILs), because of the challenged restraints agreed to by Defendants, student-athletes
 6 do not receive any share in those revenues apart from the limited scholarships and benefits that
 7 NCAA rules permit. Absent these restraints, student-athletes would receive the market value
 8 commensurate with what they contribute.

9 167. With so many cameras pointed at college sporting events, corporations have also
 10 realized an opportunity to profit by associating their products and services with student-athletes.
 11 Because the NCAA has prevented them from dealing directly with individual athletes, brands have
 12 found other ways to leverage the college sports platform to their advantage, including by entering
 13 into lucrative sponsorship deals with the NCAA, conferences, schools, and coaches.

14 168. The NCAA maintains an official list of “corporate champions and partners” that
 15 currently includes 18 major corporations ranging from Coca-Cola, AT&T, and Capital One to
 16 Google, Geico, and Uber. These companies gain exclusive marketing and promotional rights to all
 17 89 NCAA championship events, including the Division I Men’s Basketball Championship and
 18 Football Championships. Those rights pay dividends as each commercial or logo embedded in the
 19 NCAA’s programming has the potential to reach millions. As a result, and as U.S. Senator Chris
 20 Murphy noted in his 2019 report, *Madness, Inc.*, “Everything that can be branded has been. That
 21 iconic moment where athletes climb a ladder as they cut down the nets to celebrate a berth in the
 22 Final Four or the championship? Even the ladder is sponsored.”⁴³

26 ⁴² *Id.*

27 ⁴³ Chris Murphy, *Madness, Inc. How Everyone is getting rich off college sports – except the*
 28 *players*, Murphy.Senate.gov, Mar. 28, 2019, <https://www.murphy.senate.gov/download/madness-inc>
 (last visited July 25, 2021).

1 169. The nation’s largest sports apparel companies also compete for what they recognize is
 2 prime advertising real estate—college athletes whose games are broadcast for millions to see.
 3 Because the NCAA has prohibited them from dealing directly with the athletes, instead of the
 4 athletes being compensating for the use of their NILs (as would occur absent the restraints), apparel
 5 companies enter into lucrative agreements with schools and coaches instead. In 2019, Nike, Adidas,
 6 and Under Armour had secured exclusive rights to outfit 97 percent of all Division I football and
 7 basketball programs, and it was reported that, in that year alone, these three companies spent over
 8 \$300 million on college sponsorship contracts. Universities receive substantial sums from these
 9 sponsorships, and apparel advertising on network telecasts of college basketball games also helps,
 10 together with advertising from other sources, to support the large media rights payments to the
 11 NCAA and its members.

12 170. Division I programs are now defined by the apparel company that outfits their teams.
 13 For example, the University of Michigan is a Nike school, having signed a \$173.8 million contract
 14 with the company in 2016. In 2017, the Ohio State University signed a 15-year, \$252 million deal
 15 with Nike that included a \$20 million cash signing bonus. And UCLA signed a record-setting deal
 16 with Under Armour worth \$280 million.⁴⁴

17 171. Schools can further increase their sponsorship revenues by staying loyal to a
 18 particular brand. For example, when Clemson University signed a 10-year contract extension with
 19 Nike in 2018 that granted its athletic department more than \$58 million in “apparel allowances,
 20 direct cash payouts, and royalties,” the school doubled its annual payout.⁴⁵ Meanwhile, Indiana

[https://www.sportsbusinessdaily.com/Daily/Issues/2018/08/06/Marketing-and-](https://www.sportsbusinessdaily.com/Daily/Issues/2018/08/06/Marketing-and-Sponsorship/Clemson-Nike.aspx)
[Sponsorship/Clemson-Nike.aspx](https://www.sportsbusinessdaily.com/Daily/Issues/2018/08/06/Marketing-and-Sponsorship/Clemson-Nike.aspx) (last visited July 25, 2021).

1 University's renewed contract with Adidas nearly doubled its payments from \$3.7 million per year
2 under its prior agreement to \$6.7 million.⁴⁶

3 172. Over time, major apparel retailers, predominantly Nike and Adidas, have come to
4 dominate the funding of American Amateur Union ("AAU") basketball and other youth teams and
5 tournaments in an effort to affiliate their brands and products with the next generation of sports stars.
6 The value companies obtain from investing in and affiliating with youth teams is derived from the
7 opportunity it provides to create relationships with top prospects and those around them from a
8 young age. These early relationships allow the companies to influence which colleges prospects will
9 attend and, ultimately, which brands they will endorse if and when they go pro. The system creates a
10 strong incentive for basketball coaches at all levels to remain loyal to a particular brand—and have
11 their players do the same—while also continuing to recruit fresh talent on behalf of the company
12 they affiliate with. As a result, AAU basketball has become a nationwide marketplace for the most
13 talented young basketball players in the country and is now a recruiting battleground for college
14 coaches and corporations alike.

15 173. While many factors might influence the college selected by a young athlete, there is
16 evidence demonstrating that early affiliation with a particular brand often holds significant weight in
17 an athlete's future decisions. Between 2003 and 2017, roughly 80 percent of five-star prospects from
18 Nike-affiliated AAU teams went on to play for a Nike-sponsored college. And of the five-star
19 players who ultimately reached the NBA, roughly 87 percent of those who were affiliated with Nike
20 through youth teams and colleges, continued to endorse the company as professionals.⁴⁷

21 174. The impact of apparel company influences are not limited to men's basketball. In
22 April 2020, shortly after becoming the number one pick in the 2020 WNBA draft, reigning NCAA
23 national player of the year and former Oregon Duck, Sabrina Ionescu—former teammate of Plaintiff
24

26 2015, <https://www.indystar.com/story/sports/college/indiana/2015/08/17/iu-adidas-extend-apparel-agreement/31887747/> (last visited July 25, 2021).

27 ⁴⁷ Chris White, *By the Numbers: Once Nike gets a five-star college recruit, he's unlikely to ever*
28 *leave*, USA Today.com, Feb. 26, 2018, <https://sports.usatoday.com/2018/02/26/by-the-numbers-once-nike-gets-a-fivestar-college-recruit-hes-unlikely-to-ever-leave/> (last visited July 25, 2021).

1 Sedona Price—signed a multi-year endorsement deal with Nike. Nike co-founder Phil Knight is a
 2 major donor for the University of Oregon athletics program and Ionescu recently confirmed that
 3 Nike’s close ties to the university factored heavily into her decision to sign with the company amid
 4 aggressive offers and competition from other brands. “Obviously going to an Oregon school and
 5 coming from Nike and knowing Phil Knight and just knowing everyone on the Nike side [factored
 6 into the decision]” said Ionescu, “Being a Nike athlete for the last 10 years ... ultimately I think Nike
 7 is the best decision—just kind of staying loyal to my roots and continuing to be a Nike athlete at the
 8 professional level.”⁴⁸

9 175. In 2014, then University of Louisville head basketball coach Rick Pitino criticized the
 10 system, claiming that because Louisville was sponsored by Adidas, he couldn’t recruit a player from
 11 a Nike-sponsored AAU team: “Believe me, it’s a very competitive thing by these shoe companies to
 12 get players. They’re going out and recruiting like us, in the summertime. ‘Let’s get this kid into the
 13 (Nike) EYBL. Let’s get this kid in the Adidas Nations.’” It’s hard for coaches to resist the system,
 14 Pitino says, because “our pockets are lined with their money.”⁴⁹ Ironically, 98 percent of the income
 15 from Louisville’s recent Adidas sponsorship deal went directly to Pitino. In 2015-16, Pitino was
 16 reportedly paid \$1.5 million through the agreement while just \$25,000 went to the program.

17 176. In 2017, the FBI announced a sweeping corruption investigation that implicated Pitino
 18 along with other college coaches, as well as financial advisors, and Adidas executives in a
 19 conspiracy to pay five-star high school recruits to attend Louisville and other Adidas-sponsored
 20 universities. Three federal criminal complaints released in September 2017 detail some aspects of the
 21 corruption and exploitation that occurs in the current system when coaches, agents, and shoe
 22 companies work together to control a prospect’s basketball career and business dealings for their
 23 own enrichment.

27 ⁴⁹ Associated Press, *Pitino: Shoe companies too influential*, ESPN.com, Oct. 9, 2014,
 28 https://www.espn.com/mens-college-basketball/story/_/id/11672004/rick-pitino-wants-eliminate-influence-athletic-shoe-companies-recruiting (last visited July 25, 2021).

1 177. According to Sonny Vaccaro, a retired Nike executive and the person many consider
2 to be the godfather of basketball endorsement money: “Everybody is involved in this scandal.
3 There’s nobody left out. The most important person in the transaction is that high school kid ... and
4 he’s the poorest of all of them. And they’re all bidding on his ability to play basketball—to win
5 championships, go to the Final Four, to sell shoes, to sell suits, to put money in investments ... the
6 universities are now co-conspirators in everything that happens... It’s a willing co-conspiracy. The
7 shoe company wants to sell shoes. The university wants to win games so they get more money from
8 the shoe company.”⁵⁰ Vaccaro acknowledges that “there’s been scandals in college athletics forever.
9 And there’s been a word in college athletics forever: Amateurism. And amateurism and scandal go
10 together.”

11 178. While athletes have not been allowed to profit from schools’ and conferences’ social
12 media activities, social media sponsorships have become a staple in negotiations of corporate
13 partnership deals for many major college athletic programs. In addition to television deals and
14 apparel contracts, social media plays an important role in each school’s quest for more revenue,
15 providing brand exposure, fan interaction, and increased awareness of events at a relatively low cost
16 to athletic departments. A strong social media presence is appealing to potential sponsors, and teams
17 can drastically increase the value of their sponsorships by creating high-quality, engaging content
18 featuring brand logos and often the NILs of student-athletes.

19 179. For example, it was reported in 2015 that the University of Southern California
20 (“USC”) athletics department was sending about a dozen sponsored messages each week across each
21 of its official social media accounts, including on Twitter, Facebook, Instagram, and Snapchat.
22
23

27 *athletes*, *courier-journal.com*, Feb. 25, 2018, [https://www.courier-](https://www.courier-journal.com/story/news/2018/02/25/college-basketball-recruiting-scandal-system-traps-players/370215002/)
28 [journal.com/story/news/2018/02/25/college-basketball-recruiting-scandal-system-traps-](https://www.courier-journal.com/story/news/2018/02/25/college-basketball-recruiting-scandal-system-traps-players/370215002/)
[players/370215002/](https://www.courier-journal.com/story/news/2018/02/25/college-basketball-recruiting-scandal-system-traps-players/370215002/) (last visited July 25, 2021).

Fox Sports, the school's rights holder, confirmed at the time that revenue from those sponsored posts was approaching the mid-six-figures annually and the report further noted that "Fox and USC have seen no evidence that the presence of sponsor branding turns off Trojans' fans... it's the content in the graphic that drives views, whether a sponsor is present or not."⁵¹

180. Other Division I schools negotiate similar social media sponsorship arrangements and incorporate brand logos into their own athletic posts in exchange for payment from the brands.

181. In the 2017-18 academic year, sponsorship spending on college athletic departments, conferences, bowl games, and related properties totaled \$1.24 billion.⁵² In 2018, the Pac-12 conference alone generated \$153.13 million—15 percent of its total revenues (\$1,011.97 million)—from corporate sponsorship, advertising and licensing.⁵³ Pac-12 schools derived similar portions of their revenues from sponsorships as well. For example, in 2018, corporate sponsorships accounted for 16 percent (\$18.07 million) of ASU’s total athletic department operating revenues (\$113.64 million).⁵⁴

182. Flush with cash and unable to compete for athletes on the basis of financial remuneration, colleges invest their revenues internally. The constant drive to win, either between big-time Power Five schools or smaller programs hoping to make the jump onto the national stage, fuels an “arms race” that has inflated staff salaries and rationalized lavish athletic facilities, among other spending intended to make the school as competitive as possible in recruiting.

183. Collegiate athletic programs invest in facilities that outshine even their most impressive professional counterparts. In 2018, for example, Clemson finished construction of a \$55-million football complex complete with a miniature golf course, plunge pool, sand volleyball courts, laser tag, bowling lanes, movie theater, barber shop, and 23,000 square-foot weight room.⁵⁵ In 2019, the University of South Carolina completed its own \$50 million, 110,000 square-foot football

1 operations building which features, among other things, a music recording studio, video arcade, and
 2 12-foot by 27-foot video display made of thirty-six 55-inch flat screen televisions.⁵⁶

3 184. The college sports industry has also become increasingly lucrative for university
 4 athletic administrators and coaches. The median salary for an athletic director at a Division I
 5 institution is now over \$500,000 per year. Meanwhile, more than 150 football and men's basketball
 6 coaches at Division I schools earn over \$1 million per year, with the top 25 football coaches earning
 7 an average of \$5.2 million annually and the top 25 basketball coaches earning an average of \$3.2
 8 million annually.⁵⁷ Today, the highest paid public employees in 41 of the 50 states are college
 9 football or basketball coaches.

10 185. Since 1984, the average base salary for head football coaches at public universities
 11 has grown 750 percent (adjusted for inflation). As an example, Nick Saban, former head football
 12 coach at the University of Alabama, made \$11 million in 2017—more than any NFL coach.⁵⁸ Mike
 13 Krzyzewski, former head basketball coach at Duke, a private university, made \$8.98 million in the
 14 same year. These figures represent just one aspect of the compensation that college coaches receive.
 15 On top of extravagant salaries, coaching contracts often include additional perks like complimentary
 16 flight time on private jets, personal cars, country club memberships, negotiated percentages of ticket
 17 sales, and six-figure performance bonuses.

18 186. Coaches also share in the revenues that their schools bring in from commercial
 19 sponsorship contracts and generate income from their own personal NIL deals, including

consultation contracts with apparel companies, television and radio programs, employment by or ownership of sports camps and clinics, book deals, and commercial speaking engagements.

187. For example, between 2014 and 2017, University of Kentucky's ("UK") then-head basketball coach John Calipari reported approximately \$1.1 million in outside income on top of his \$7.75 million salary from UK. The sources of this income included Calipari's personal contract with Nike, book and video royalties, and various speaking fees.⁵⁹

188. In 2014, Michigan State University signed an apparel deal with Nike that included a \$100,000 annual cash payment to then-head football coach Mel Tucker. Men's basketball coach Tom Izzo also benefitted from the school's apparel deal, as well as from a separate personal contract with Nike that netted him a \$50,000 signing bonus, \$400,000 in annual compensation, \$95,000 per year in equipment and apparel, and the opportunity to receive additional bonuses if his team wins in the post-season tournament. Izzo also received \$35,000 in outside income from his camps and clinics.⁶⁰

189. University of North Carolina's ("UNC") former basketball coach Roy Williams released the details of his personal contract with Nike, which paid out \$250,000 in 2018. Williams's compensation from Nike was set to increase gradually over the next ten years, ultimately reaching \$340,000 by 2028.⁶¹ In December 2018, four other UNC coaches also had personal service contracts with Nike. Along with Williams, Mack Brown (football), Anson Dorrance (women's soccer), Mike Fox (baseball), and Sylvia Hatchell (women's basketball) each had similar deals. UNC also has its own ten-year contract with the retailer that runs through 2028. In 2019, the school received \$5.1 million in product and \$3.25 million in cash from Nike.⁶²

⁶² *Id.*

190. While NCAA rules allow college athletes to trademark their names or slogans, they have prohibited athletes from collecting any royalties from the use of those trademarks. Meanwhile, coaches are free to profit from the licensing of their own trademarks. For example, Clemson football coach Dabo Swinney has trademarked his own name and, in 2016, he applied to trademark the phrases “BYOG” and “Bring Your Own Guts” after a post-game interview in which he said the phrases went viral. Time Magazine reported that as part of Swinney’s \$3.3 million compensation package, Clemson paid him \$500,000 in 2015 for the rights to market his name, image, and likeness. And, thanks to the trademarks, other parties that sell Swinney trademarked products must pay 10 percent of the wholesale price to the coach for using his name, and an additional 10 percent for using BYOG or Bring Your Own Guts. The Collegiate Licensing Company, which helps manage Swinney’s relationships with outside vendors, has reportedly given permission to at least 13 companies, including Nike, to sell merchandise stamped with the BYOG slogan, Swinney’s name, or both.⁶³

191. While student-athletes were barred from receiving compensation for promotional appearances, schools can profit by selling “access” to their athletes to the highest bidder. For example, ESPN reported that, in 2013, Texas A&M auctioned a seat next to Heisman Trophy winner Johnny Manziel at an athletic department banquet to a booster for \$20,000.⁶⁴ In the absence of rules limiting athletes from making similar deals, such compensation to the athletes would have been the norm. Already, since the temporary suspension of most NIL rules on July 1, 2021, Texas A&M football players Isaiah Spiller and Demani Richardson are set to earn \$10,000 each for exclusive interviews posted to Aggies-centric website TexAgs.com.⁶⁵

⁶³ Sean Gregory, *Meet Dabo Swinney®, The Clemson Coach Who Trademarked More Than His Name*, TIME.com, Jan. 8, 2016, <https://time.com/4171504/dabo-swinney-clemson-coach-who-trademarked-bring-your-own-guts/> (last visited July 25, 2021).

⁶⁵ Jace Evans, *Texas A&M players Isaiah Spiller, Demani Richardson make \$10,000 each for interviews with fan site in NIL deal*, USAToday.com, July 18, 2021, <https://www.usatoday.com/story/sports/ncaaf/sec/2021/07/17/texas-am-football-players-making-10-k-interviews-nil-deal/8005537002/> (last visited July 10, 2024).

1 192. And, while student-athletes were prohibited from receiving compensation in exchange
 2 for their autographs, others have been free to profit from the sale of those same autographs without
 3 fear of penalty. In 2013, at the same time Manziel was being investigated by the NCAA for allegedly
 4 accepting money in exchange for signing autographs for memorabilia brokers, ESPN reported that
 5 independent merchandiser Aggieland Outfitters had “recently auctioned off six helmets signed by
 6 Manziel and Texas A&M’s other Heisman Trophy winner, John David Crow, for \$81,000.”⁶⁶ At the
 7 time, NCAA Vice President Kevin Lennon acknowledged that “student-athletes are often asked for
 8 autographs from fans, but unfortunately, some individuals’ sole motivation in seeking an autograph
 9 is for resale.”⁶⁷

10 193. From what they wear, to where you can watch them and what advertisements come
 11 across your screen, in the modern world of big-time college sports, student-athletes serve the
 12 financial interests of their colleges and the corporations that have paid well to turn them into walking
 13 billboards.

14 194. If not for the NCAA’s restrictions on athlete NIL compensation, there would have
 15 also been (as there now is) a market for NCAA sports video games from which the athletes would
 16 share in the revenues. EA Sports produced college sports video games, which were wildly popular
 17 with fans, until former Arizona State University quarterback Sam Keller sued EA and the NCAA,
 18 arguing that they were illegally profiting from the images of college football and basketball players
 19 in such games.⁶⁸ The *Keller* case established that video games like the previously-marketed *NCAA*
 20 *Football* and *NCAA Basketball* titles cannot be produced without obtaining permission from the
 21 athletes to use their NILs. But, although EA indicated that it was willing to pay players to use their

1 likenesses in the games, the NCAA refused to change its rules to allow such payments.⁶⁹ And, when
 2 the case ultimately settled for a total of \$60 million paid to the 24,819 student-athletes whose NILs
 3 were featured in the games from 2003 to 2014, the NCAA ended its licensing agreement with EA
 4 and the games were discontinued after *NCAA Football 14*.

5 195. In light of the recent developments related to college athlete NIL rights, in February
 6 2021, EA announced its intention to revive its college sports games. And, on July 1, 2021, EA
 7 released a statement indicating that it is “watching the recent developments regarding student-athlete
 8 name, image and likeness very closely. It’s still very early stages at this point, and we plan to explore
 9 the possibility of including players in EA SPORTS College Football.”⁷⁰ A number of organizations
 10 have announced their intention to enter the group licensing business for Division I athletes to help
 11 them take advantage of these opportunities now that the NCAA has suspended many of its NIL
 12 rules.⁷¹

13 **C. The NCAA’s history of antitrust violations**

14 196. Rather than permit student-athletes to engage in competition for NIL payments as the
 15 commercial nature of college sports has exploded, Defendants have combined and conspired to
 16 foreclose athletes from the market entirely. This has been accomplished by Defendants jointly
 17 adopting and imposing rules that have the purpose and effect of preventing players from offering the
 18 use of their NILs in competitive markets.

19 197. The NCAA has a history of violating federal antitrust law. As a result, over the years,
 20 numerous parties have brought and successfully prosecuted antitrust lawsuits against the NCAA. In
 21 each of these cases, the NCAA and its members argued that loosening their anticompetitive restraints

1 would be the death knell of amateurism and would irreparably damage consumer demand for college
2 sports. Yet, time and time again, the NCAA's specious claims have proven false and demand has
3 only continued to steadily grow up through the present.

4 198. In 1984, the U.S. Supreme Court ruled in *NCAA v. Board of Regents* that the NCAA
5 had violated the Sherman Act by limiting the number of live televised football games under the
6 media plan it adopted for the 1982-85 football seasons. In conjunction with the plan, the NCAA had
7 announced that it would punish any member institution that abided by a competing agreement with
8 another network to televise more games. At the Supreme Court, the NCAA decried schools freely
9 competing to sell their broadcast rights, claiming that such activity would pose an existential threat to
10 amateurism and consumer demand. But the Court granted injunctive relief and held that the NCAA's
11 anticompetitive scheme unlawfully restrained the market for live broadcasts of college football
12 games.⁷² Since then, schools have engaged in such competition and generated billions of dollars in
13 revenues as a result. And, despite the NCAA's dire predictions about the destruction of college
14 sports, consumer demand now flourishes more than ever.

15 199. In *Law v. NCAA*, the Court of Appeals for the Tenth Circuit upheld a summary
16 judgment ruling that the NCAA's then-existing cap on part-time coaches' salaries at \$16,000 per
17 year was an unlawful restraint of trade. The NCAA opposed allowing schools to freely compete,
18 claiming that it would be contrary to the collegiate model. The Court of Appeals held that the
19 presence of a horizontal agreement to fix compensation was presumptively anticompetitive, and that
20 the NCAA had failed to present even a triable issue concerning whether the salary restraint was
21 procompetitive.⁷³ Today, such competition is unrestrained, assistant coaches often earn *millions*,⁷⁴
22 and consumer demand still flourishes.

23
24
25 ⁷² 468 U.S. 85, 119 (1984) (rejecting NCAA argument that restricting sale of broadcast rights
was necessary "to preserve amateurism").

26 ⁷³ 134 F.3d 1010, 1021 (10th Cir. 1998) (rejecting NCAA's proposed procompetitive
27 justifications for restricting assistant coach salaries).

28 ⁷⁴ For example, between 2009 and 2015, assistant men's basketball coaches' salaries increased
by nearly 40 percent.

200. In *White v. NCAA*, the NCAA argued against allowing schools to freely compete by offering cost-of-attendance (“COA”) scholarships, calling such scholarships “pay for play.”⁷⁵ Today such competition is unrestrained, and both full COA scholarships and payments *above* COA are ubiquitous (as discussed further below, and recently confirmed by the Ninth Circuit and Supreme Court), while consumer demand for college sports is healthier than ever.

201. In 2009, a group of Division I men’s basketball and football student-athletes brought an antitrust class action—*O’Bannon v. NCAA*⁷⁶—challenging the NCAA’s rules that prevent athletes from receiving a share of the revenue from member institutions that the NCAA and its members derive from the use of athletes’ NILs in live game broadcasts, related footage, and video games. The district court held that the challenged rules were more restrictive than necessary to achieve any legitimate procompetitive justification and thus violated the antitrust laws. The district court enjoined the NCAA from prohibiting its schools from directly paying athletes (1) full COA scholarships and (2) \$5,000 per year in deferred compensation for the game-related use of their NILs, through trust funds distributable after the athletes leave school. The Ninth Circuit affirmed the liability finding and COA portion of the remedy, but held that on the particular record before the district court, plaintiffs had not shown that allowing payments directly from schools in deferred compensation for game-related NIL usage would be virtually as effective as the existing restraints in preserving “amateurism”—and thus consumer demand for college sports.⁷⁷ Since the *O’Bannon* decision, based on new evidence and recent factual developments, this Court for the Northern District of California found in a decision upheld by the Ninth Circuit and Supreme Court that the NCAA’s compensation rules “do not follow any coherent definition of amateurism.”⁷⁸ Moreover, since *O’Bannon*, student-athletes regularly receive compensation from their schools that exceeds COA—including both

⁷⁵ See NCAA Memo. P&A in Support. Summ. J. 28, *White v. NCAA*, No. 06-cv-99 (C.D. Cal. Oct. 22, 2007, ECF No. 220).

⁷⁶ 802 F.3d 1049 (9th Cir. 2015).

⁷⁷ See *id.* at 1072-79.

⁷⁸ *In re NCAA Athletic Grant-in-Aid Cap Antitrust Litig.* (“*NCAA GIA*”), 958 F.3d 1239, 1249 (9th Cir. 2020) (quoting and affirming *In re NCAA Athletic Grant-in-Aid Cap Antitrust Litig.*, 375 F. Supp. 3d 1058, 1074 (N.D. Cal. 2019)).

1 education and non-education-related compensation—and consumer demand for college sports has
2 continued to grow exponentially.

3 202. After years of litigation following complaints filed in 2014, on May 18, 2020, the
4 Ninth Circuit Court of Appeals upheld a decision and injunction entered by this United States
5 District Court for the Northern District of California in favor of a nationwide class of college-athletes
6 challenging NCAA-imposed caps on athletic scholarships.⁷⁹ In *In re NCAA Athletic Grant-in-Aid*
7 *Cap Antitrust Litigation*, the Ninth Circuit affirmed the district court’s holding that NCAA’s
8 compensation restraints—agreed to by the Defendants in this Complaint—imposed substantial
9 anticompetitive effects in relevant markets that were not justified by procompetitive justifications,
10 and that there were less restrictive alternatives to the rules that would be virtually as effective in
11 serving any procompetitive purpose for them. The Ninth Circuit affirmed the district court’s order
12 enjoining the NCAA from enforcing rules that restrict education-related benefits that its member
13 institutions may offer student-athletes.

14 203. In reaching its decision in the *NCAA GIA* litigation, the Ninth Circuit held that
15 “[a]ntitrust decisions are particularly fact-bound,” the “Rule of Reason contemplate[s] case-by-case
16 analysis” that is “inherently fact-dependent” and “evaluates dynamic market conditions and
17 consumer preferences, and, citing *O’Bannon*, that “courts must continue to subject NCAA rules,
18 including those governing compensation, to antitrust scrutiny.”⁸⁰

19
20
21
22
23

⁷⁹ *NCAA GIA*, 958 F.3d 1239.

24
25
26
27
28
⁸⁰ *NCAA GIA*, 958 F.3d at 1253; *see also id.* (citing *Flooring Mfrs.’ Ass’n v. United States*, 268 U.S. 563, 579 (1925) (“[E]ach case arising under the Sherman Act must be determined upon the particular facts disclosed by the record, and . . . opinions in those cases must be read in the light of their facts”); Phillip Areeda & Herbert Hovenkamp, *Antitrust Law: An Analysis of Antitrust Principles and Their Application*, ¶ 1205c3 (4th ed. 2018) (“Continuing contracts in restraint of trade,” are “typically subject to continuing reexamination,” and “even a judicial holding that a particular agreement is lawful does not immunize it from later suit or preclude its reexamination as circumstances change.”).

D. The Supreme Court’s *Alston* decision, this Court’s motion to dismiss and class certification orders, and state laws result in the NCAA and Conference Defendants’ interim suspension of many of their NIL restraints.

204. In *NCAA v. Alston*, 141 S. Ct. 2141 (2021), decided on June 21, 2021, the Supreme Court reviewed the Ninth Circuit’s decision and unanimously affirmed it in full 9-0. Contrary to Defendants’ argument, the Supreme Court held that the NCAA’s so-called amateurism rules are subject to the same rule-of-reason analysis applicable to other businesses, especially because the “NCAA *accepts* that its members collectively enjoy monopsony power in the market for student-athlete services, such that its restraints can (and in fact do) harm competition.”⁸¹ The Court further held that nothing in its decision in *Board of Regents* approved of the NCAA’s limits on athlete compensation or provided the NCAA with any reduced scrutiny under, or protection from, rule of reason review.⁸² Finally, the Supreme Court agreed with the Ninth Circuit’s affirmance of this Court’s application of the rule-of-reason, finding that the NCAA’s restraints on education-related benefits violated Section 1 of the Sherman Act.⁸³ In a concurring opinion, Justice Kavanaugh wrote that the NCAA’s remaining compensation rules (*i.e.*, those *not* at issue in *Alston*) “may lack” a legally valid procompetitive justification, that its “current compensation regime raises serious questions under the antitrust laws,” and reiterated that the “NCAA is not above the law.”⁸⁴

205. A few days following the *Alston* decision, on June 24, 2021, this Court ruled on Defendants’ motion to dismiss Plaintiffs’ original complaints challenging Defendants’ NIL rules. The Court largely denied Defendants’ motion to dismiss.⁸⁵

206. Around the same time that the *Alston* and *House* decisions were issued, the NCAA and its members were facing the prospect of an effective date of July 1, 2021, for several state laws and executive orders that would permit student-athletes to monetize their NILs. Indeed, at least sixteen of these laws became effective on July 1, 2021 or allowed schools to opt in immediately as of

⁸¹ *Alston*, 141 S. Ct. at 2156 (emphasis in original).

⁸² *Id.* at 2157-58.

⁸⁵ Order Granting in Part and Denying in Part Motions to Dismiss, ECF No. 152.

1 that date (Alabama, Colorado, Connecticut, Florida, Georgia, Illinois, Kentucky, Louisiana,
2 Mississippi, Nebraska, New Mexico, Ohio, Oklahoma, Oregon, Pennsylvania, and Texas).

3 207. In the face of these developments in the legal landscape, Defendants decided to adopt
4 their new, “interim” NIL policy, which was announced on June 30 and became effective on July 1,
5 2021. That policy temporarily suspended enforcement of many of the NCAA’s NIL restraints.

6 208. The period after adoption of the NCAA’s interim policy is already providing a natural
7 experiment where student-athletes are, with certain continuing limitations, able to market their NILs
8 to third parties. Indeed, NCAA President Emmert stated in a recent video that seeing “how all this
9 unfolds” will be informative about what rules there should be and what is in the best interests of the
10 athletes.⁸⁶ What we have seen thus far is that NIL opportunities are widespread and have been taken
11 advantage of by student-athletes across a wide variety of sports—without any harm to consumer
12 demand. Representatives of Defendants have admitted that the suspension of most NCAA NIL rules,
13 with the authority now vested in the individual schools and conferences, has gone well since July 1.
14 On July 7, Purdue Athletics Director Mike Bobinski commented that, “for all the wringing of hands
15 and other gloom and doom prognostications, I don’t see (any of that) yet.”⁸⁷ And Big 12
16 Commissioner Bob Bowlsby stated on July 14, 2021, during one of the Big 12 Media Days, that “I
17 think relative to name, image and likeness there was a commonly held misperception that the sky
18 was going to fall on July 1 and we were going to be in an Armageddon scenario,” but “[o]bviously
19 that hasn’t happened. There have been some things that have occurred that have raised eyebrows, but
20 generally speaking, schools are managing it.”⁸⁸

209. On September 22, 2023, the Court granted plaintiffs’ motion for certification of an injunctive relief class.⁸⁹ On November 3, 2023, the Court granted plaintiffs’ motion for certification of three damages classes.⁹⁰

E. The challenged restraints are not necessary to serve any purported procompetitive purpose.

1. Any procompetitive justification based on consumer demand for college sports is legally irrelevant because it concerns an entirely different market.

210. As explained *supra*, Defendants’ restraints have anticompetitive effects in the relevant Division I labor markets. The purported procompetitive justifications, on the other hand, concern entirely separate and distinct output markets for Division I sports and are therefore legally irrelevant for antitrust analysis in this case.

211. The purported procompetitive benefit relied upon most heavily by Defendants in recent antitrust litigation challenging NCAA compensation restraints is the claim that such restraints are necessary to preserve consumer demand for college sports. But, even if the challenged restraints did have some positive effect on consumer demand—they do not—those benefits would relate to the consumer output markets for college sports, which is distinct from the relevant labor markets here that are directly restrained by Defendants’ rules.

212. The Ninth Circuit in the *NCAA GIA* litigation explained that “[i]t is not settled” whether courts may “consider a restraint’s procompetitive benefits in a market outside the market deemed relevant for the purpose of evaluating a restraint’s anticompetitive effects.”⁹¹ Because the issue was not raised by parties in that case, it was not addressed by the Court either.⁹² But, concurring in the decision, Chief Judge Smith wrote that “the underlying purpose of the Sherman Act—promoting competition—counsels in favor of conducting a more limited Rule of Reason analysis,” confined to the market that is being restrained. “If the purpose of the Rule of Reason is to

⁸⁹ ECF No. 323.

⁹⁰ ECF No. 387.

⁹² *Id.*

determine whether a restraint is net procompetitive or net anticompetitive, accepting procompetitive effects in a collateral market disrupts that balancing. It weakens antitrust protections by permitting defendants to rely on a broader array of justifications that promote competition, if at all, in collateral markets where the restraint under analysis does not occur.”⁹³

2. Even if effects on consumer demand in output markets were relevant, the restraints at issue are not necessary to preserve consumer demand for college sports.

213. Whatever doubt there may have been about the validity of Defendants’ amateurism justification in 2019, when the *Grant-in-Aid Cap* trial was conducted, ensuing market realities and new factual developments show that “amateurism” is no longer a legitimate procompetitive justification for any of the Defendants’ compensation restraints. Specifically, despite the ubiquitous payment of “*Alston* benefits,” the continuation and expansion of full-COA scholarships and payments, and substantial and unlimited NIL payments from third parties, there has been no adverse effect on consumer demand for Division I college sports. To the contrary, the NCAA concedes that these payments and benefits to college athletes have not had any adverse impact on consumer demand.

214. In fact, since the NCAA has allowed these benefits and compensation, television ratings and revenues (broadcast and otherwise) for Division I college sports have increased exponentially. Accordingly, a number of NCAA and Conference officials have since admitted that amateurism is no longer a justification for their restraints.

215. Moreover, recent public opinion surveys demonstrate that fans support student-athletes being able to profit from the use of their NILs, and thus that consumer demand would not be negatively affected if Defendants’ anticompetitive NIL restraints were eliminated. Indeed, the growing public sentiment in support of student-athlete NIL rights indicates that the lifting of these restraints would actually improve fan interest in college sports.

216. In June 2021, College Pulse surveyed 829 college students at 51 universities in June 2021. The results of that survey indicated that 89% of students surveyed believe that student-athletes

⁹³ *Id.* at 1269 (Smith, C.J., concurring).

1 should be able to profit off their likenesses, 88% think the athletes should be able to profit by
 2 endorsing products on social media, and 93% think the athletes should be able to profit by appearing
 3 in advertisements.⁹⁴

4 217. In December 2019, the Associated Press polled 1,053 American adults: 66 percent of
 5 respondents supported allowing athletes to earn money from the use of their NILs.⁹⁵

6 218. The results of a November 2019 Turnkey Sports Poll of more than 2,000 senior-level
 7 sports industry executives similarly indicated that consumer demand for intercollegiate athletics will
 8 not suffer if college athletes are permitted to monetize their NILs. Only 14 percent of the respondents
 9 in that study opined that allowing student-athletes to benefit from their NILs would have a negative
 10 effect on fan interest, while 45 percent indicated that such a change would have “no impact” on fan
 11 interest, and 35 percent believed it would actually positively impact fan interest.⁹⁶ These recent
 12 survey results indicate that if student-athletes were allowed to monetize and profit from their own
 13 NILs it would likely increase fan interest in, and consumer demand for, college sports.

14 219. In May 2022, *The Washington Post* and the University of Maryland conducted a poll
 15 in which 88% of 1,503 respondents said that allowing athletes to receive NIL compensation either
 16 “hasn’t made a difference” or had a “positive impact” on their enjoyment of college sports.⁹⁷

17 220. More broadly, survey evidence presented by the plaintiffs in the *NCAA GIA* litigation
 18 “tested [consumer] behavior and found that consumers would continue to view or attend college
 19 athletics (at the same rate) even if eight types of compensation that the NCAA currently prohibits or

limits were individually implemented.”⁹⁸ In fact, the survey results indicated that consumers would tend to watch or attend *more* college sports events if athletes were treated more fairly by being provided with additional compensation that the NCAA rules currently prohibit.

221. Indeed, the NCAA itself acknowledged in its April 17, 2020 Final Report and Recommendations that “allowing such compensation for some promotional or commercial activities can likely be accommodated in a manner consistent with the NCAA’s model of amateur intercollegiate competition.”⁹⁹

222. The Ninth Circuit in the *NCAA GIA* litigation affirmed that the record in the case supported the district court’s findings that NCAA rules “permit a wide range of above-[cost-of-attendance] payments—both related and unrelated to education. Without losing their eligibility, student-athletes may receive, for instance: “(i) awards valued at several hundred dollars for athletic performance (‘athletic participation awards’)[,] which may take the form of Visa gift cards; (ii) disbursements—sometimes thousands of dollars—from the NCAA’s Student Assistance Fund (“SAF”) and Academic Enhancement Fund (‘AEF’) for a variety of purposes, such as academic achievement or graduation awards, school supplies, tutoring, study-abroad expenses, post-eligibility financial aid, health and safety expenses, clothing, travel, ‘personal or family expenses,’ loss-of-value insurance policies, car repair, personal legal services, parking tickets, and magazine subscriptions; (iii) cash stipends of several thousands of dollars calculated to cover costs of attendance beyond the fixed costs of tuition, room and board, and books, but used wholly at the student-athlete’s discretion; (iv) mandatory medical care (available for at least two years after the athlete graduates) for an athletics-related injury; (v) unlimited meals and snacks; (vi) reimbursements for expenses incurred by student-athletes’ significant others and children to attend certain athletic competitions; and (vii) a \$30 per diem for ‘unitemized incidental expenses during travel and

1 practice’ for championship events.”¹⁰⁰ The Ninth Circuit’s decision explained that “[t]he record
2 indicates that the NCAA does little to regulate or monitor the use of these funds” from the “Student
3 Assistance Fund” or “Academic Enhancement Fund.”¹⁰¹

4 223. In its recent history, the NCAA has made many exceptions allowing for additional
5 payments to student-athletes—both education and non-education related—beyond the cost of
6 attendance. For example, before 2015, athletic participation awards did not take the form of cash-
7 equivalent Visa gift cards. And, when the NCAA changed its rules to allow full COA scholarships in
8 August 2015, the number of student-athletes receiving above-COA payments, such as cash stipends,
9 Pell Grants, and AEF and SAF distributions, increased significantly. This expansion of above-COA
10 payments has not coincided with any decline in consumer demand for intercollegiate athletics. To the
11 contrary, demand for college sports has only risen, as demonstrated by the consistent and ever-
12 growing revenues brought in by Division I basketball and FBS football. Thus, the current factual
13 record shows that non-educational payments to student-athletes in excess of COA are no longer a
14 “quantum leap” from NCAA practice, as the court held it would be at the time of *O’Bannon*.¹⁰²

15 224. Two-sport athletes have also received million-dollar payments as professionals in one
16 sport while retaining NCAA eligibility in another. For example, in 2018, Kyler Murray signed a \$9
17 million contract to play baseball for the Oakland A’s while he was still playing football at the
18 University of Oklahoma. If such compensation does not implicate “pay-for-play” or otherwise
19 undermine the distinction between college and professional, it is hard to imagine how compensation
20 for NIL rights would do so. And again, all these forms of compensation have been permitted, and
21 consumer demand for college sports has only increased.

22 225. Moreover, allowing compensation would not affect consumer demand for college
23 sports to the extent that such demand is “driven by consumers’ perception that student-athletes are
24 students.”¹⁰³ Plaintiffs do not challenge any of the NCAA’s existing rules and regulations that

28 ¹⁰³ *See In re NCAA Athletic Grant-in-Aid Cap Antitrust Litig.*, 375 F. Supp. 3d at 1105.

1 require college athletes to be students in good standing at their respective schools. And if student-
 2 athletes are allowed to receive scholarships beyond the current limits and/or compensation for their
 3 NILs and athletic services, schools will provide educational resources and programs designed to help
 4 their athletes learn about personal brand management and athletes will gain access to new academic
 5 opportunities to develop marketing and financial skills. This is already happening with the NCAA's
 6 current suspension of some of the NIL rules. School athletic departments across the country are
 7 offering new educational programming to their athletes and as of July 1, 2021 53 of the 65 Power
 8 Five universities had announced an NIL-related initiative partnering with companies like Opendorse,
 9 INFLCR, or Altius Sports.¹⁰⁴ Schools are also offering new NIL-focused classes and hiring
 10 additional staff to give their athletes an edge. That is in keeping with the NCAA's purported
 11 objective to help athletes prepare for life after college, which for the vast majority of them does not
 12 include a professional sports career. NCAA President agreed in a recent interview that providing NIL
 13 opportunities encourages student-athletes to experience and try out different professional options.¹⁰⁵

14 226. The district court in the *NCAA GIA* litigation relied on testimony by the NCAA's and
 15 conferences' own witnesses that consumer demand for Division I basketball and FBS football is
 16 actually driven by consumers' perception that student-athletes are, in fact, students. For example,
 17 University of Wisconsin-Madison Chancellor Rebecca Blank testified that fans of college sports
 18 "love seeing their fellow students out there playing" and that viewership of college sports is based on
 19 student-athletes being "students at the university." Eugene Smith, athletic director at the Ohio State
 20 University, testified to a similar point and explained the "collegiate fan is more aligned to the
 21 educational experience that college sports provide." AAC Commissioner and former CBS/ESPN
 22 executive, Michael Aresco, noted that the programming of televised college sports focuses on "the
 23 college experience," which includes the campus, academics, and community service.¹⁰⁶ The district

28 ¹⁰⁶ *In re NCAA Athletic Grant-in-Aid Cap Antitrust Litig.*, 375 F. Supp. 3d at 1082.

1 court concluded (and the Ninth Circuit affirmed on appeal) that this testimony did not support, but
2 rather undermined, the NCAA’s justification for its compensation rules because, in the absence of
3 those rules, college athletes would still be students.¹⁰⁷ Such testimony similarly suggests that the
4 restraints challenged in this Complaint are not necessary to preserve consumer demand for college
5 sports. Absent the challenged rules, college athletes would remain students and “fellow students,
6 alumni, and neighbors of the schools would continue to identify with them.”¹⁰⁸

7 227. The fact that the compensation rules are not needed to preserve consumer demand is
8 conclusively established by the natural experiment of the NCAA’s interim NIL policy. Most NIL
9 rules have been suspended and scores of Division I athletes are now receiving NIL compensation
10 across Division I sports. Yet, there is no evidence that these dramatic and conspicuous NIL payments
11 have in any way adversely impacted consumer interest or demand for Division I sports. To the
12 contrary, it is precisely because so many fans are supportive of Division I athletes that the many
13 sponsors and business are so interested in partnering with the athletes and paying for their NIL
14 rights.

15 228. Moreover, to the extent that the purported procompetitive purpose of promoting
16 consumer demand is served by the rules at all—it is not—there are reasonable and patently less
17 restrictive alternatives available. For example, as discussed above, an injunction could forbid
18 enforcement of national NCAA NIL rules, but permit such rules at the conference and school level.
19 In an interview about NIL, former NCAA President Mark Emmert agreed that sports serve different
20 functions at different schools, and that the NCAA needs to govern in a way that is more reflective of
21 that, with consideration given to a decentralized and deregulated version of college sports, shifting
22 power back to conferences and campuses. And the NCAA’s interim policy, in fact, has adopted just
23 such a school and conference empowerment structure as the less restrictive alternative currently in
24 effect, without any evidence of harm to consumer demand.

27 ¹⁰⁷ *Id.*

28 ¹⁰⁸ *Id.*

229. Fears about potential abuses of a competitive market should not be conflated with fears of competition itself, nor do they justify restrictions on a free market.

3. Education and compensation are not mutually exclusive.

230. The NCAA, in other litigation, has also argued that its compensation rules somehow promote the integration of student-athletes with their academic communities and that payments for NILs or compensation based on athletic performance would “create a wedge” between student-athletes and the student body at large. The NCAA has further claimed that the “chase for endorsements” could interfere with student-athletes’ focus on education.

231. To begin with, this paternalistic rationale does not constitute a legitimate procompetitive justification for a sweeping market restraint on adult student-athletes being able to commercially benefit from their own names, images, and likenesses.

232. Moreover, in *O’Bannon*, the Court held that this purported goal is better achieved by other NCAA rules, such as those requiring athletes to attend class or forbidding more than a certain number of practice hours per week.¹⁰⁹ And, while the Court acknowledged the NCAA may have some interest in preventing a social “wedge” between athletes and the rest of the student body, it held that “it does not justify a total, ‘sweeping prohibition’ on paying student-athletes for the use of their NILs.”¹¹⁰

233. For one, income disparities already exist on college campuses as a result of family background and wealth derived from other sources. And, despite the existing disparities, there is no evidence that students with more financial resources are negatively impacted in terms of their integration with peers or the quality of education they receive.

234. The ability to earn compensation will enhance, not detract from, the integration and academic experiences of college athletes. Education and pay are not mutually exclusive and are, in fact, pursued simultaneously by millions of college students across America. And as noted herein,

¹⁰⁹ 802 F.3d at 1061.

¹¹⁰ *Id.* at 1060.

1 schools now admit that marketing NIL brings its own educational benefits as it teaches students
2 business, marketing and promotional skills that are themselves educational in nature.

3 235. In the *NCAA GIA* litigation, the district court rejected the NCAA’s so-called
4 “academic integration” and “wedge” arguments,¹¹¹ and its finding was not challenged by the NCAA
5 on appeal. Moreover, as explained above, the Ninth Circuit found a wealth of evidence showing that
6 NCAA rules already permit athletes to receive numerous above-COA payments “related and
7 unrelated to education.”

8 236. The NCAA’s compensation restrictions do not promote integration and in fact create a
9 significant divide between the rights enjoyed by purely academic students and those allowed to
10 athletes. The NCAA itself has acknowledged that “the current rules preclude student-athletes from
11 engaging in a wide range of promotional activities that are open to college students generally, a
12 situation that is inconsistent with the NCAA’s goal of treating student-athletes in the same manner as
13 the student-body in general.”¹¹² Non-athlete students are free to exploit the full potential of their NIL
14 rights while student-athletes have been forced to forego any NIL compensation whatsoever under the
15 NCAA’s complicated system of regulations. Allowing student-athletes to monetize their NILs will
16 increase the validity of the NCAA’s claim that the athletes are “students first” by treating athletes
17 more like their peers.

18 237. Plaintiffs do not challenge the NCAA’s existing rules and regulations that require
19 them to be students in good standing at their respective schools or that require athletes to meet
20 certain academic standards to remain eligible for competition. Moreover, if athletes were allowed to
21 earn compensation for their athletic services or NIL while in school, schools would provide
22 additional educational resources and programs designed to help athletes learn about finances,
23 marketing and personal brand management and athletes would gain access to new opportunities to
24 develop life skills. As explained above, this is already happening with schools investing substantial

(last visited July 10, 2024).

1 resources to provide new educational opportunities to give their athletes the best opportunity to
2 maximize their NIL value.

3 **4. NCAA compensation restrictions do not prevent exploitation—they are**
4 **exploitative.**

5 238. The NCAA has also previously argued that the elimination of its compensation
6 restrictions would lead to “over-commercialization, which transposes the collegiate model into a
7 system that more closely resembles the professional sports approach.” In particular, the NCAA has
8 asserted that its no-endorsement rules “prevent students from becoming billboards for
9 commercialism.”

10 239. To begin with, this supposed rationale does not constitute a legitimate procompetitive
11 justification for a sweeping market restraint on college athlete compensation.

12 240. Moreover, in a system where billions of dollars are generated primarily off the backs
13 (literally, when sponsors pay to outfit athletes with branded equipment and apparel) and athletic
14 successes of student-athletes, the restrictions on compensation do not prevent exploitation—they are
15 exploitative. As explained above, whatever downside comes from commercialization is already
16 impacting college athletes; the current rules merely ensure they have a limited share in the benefits
17 from such commercialization. The unfairness in this arrangement grows exponentially with each new
18 multi-million (or multi-billion) dollar television and sponsorship deal, coaching contract, and facility
19 construction, while the selective and blanket restrictions on student-athletes are maintained. As it
20 stands, the current system does far more to advance the financial interests of the NCAA,
21 broadcasters, corporations, and athletic departments than it does for the athletes who provide the
22 product from which everyone else profits.

23 241. John Shoop, former offensive coordinator for the University of North Carolina
24 football team, described his first-hand perspective of the inequities of this system in a 2018
25 documentary: “I know people say these players get everything. No they don’t get everything. What
26 they get is a facility that might have a barbershop in it, tons of flat screen TVs, they might get a
27 bunch of Nike spikes. At this time in their life, when they really did have incredible value, I was the
28 one absorbing all that value, not them. That didn’t feel good to me. I was the one getting paid a lot,

1 not them. For some of these young men, these are the four years where their earning potential is
 2 higher than it's ever been. This is it. When they graduate, they're done... They're propelling a
 3 billion-dollar industry right here and they're getting a sweat suit for it.”¹¹³

4 242. The harm to student-athletes is exacerbated because only a small number of them will
 5 go on to play professionally. This fact highlights that for most Division I athletes, their college years
 6 are when they may have their greatest earning potential.

7 243. The current restrictions have also created an incentive for student-athletes, boosters,
 8 agents, third parties, and others to violate the rules and enter into under-the-table deals. The absence
 9 of an above-the-board market has thus created an environment where exploitation is more, not less,
 10 likely. On the other hand, permitting payments out in the open would allow the NCAA and its
 11 members to more effectively educate the athletes on how to avoid exploitation.

12 **5. Female Athletes Have Been Especially Adversely Impacted by NIL Restrictions**
 13 **and Will Profit in the New NIL Era.**

14 244. The NIL rules adversely impacted female athletes more than their male counterparts
 15 because (1) they have fewer professional opportunities and they must use their time in school to
 16 monetize, and (2) because the NCAA promotes female sports less than it does male sports and thus
 17 many female athletes are not as well known.

18 245. There was unanswered demand for the use of NIL of female athletes before the
 19 interim NIL rules. Take Hayley Hudson, a Stanford volleyball star who had to turn down an offer
 20 from a sunglass company, a clothing company, and a TV company who wanted to make a reality
 21 show based on “tall families.” She “medically retired” from volleyball before the interim NIL rules
 22 were in effect.

23 246. A study conducted by the website AthleticDirectorU and the marketing firm Navigate
 24 Research found that 13 of the 25 college athletes with the greatest annual endorsement potential
 25 between \$46,000 and \$630,000 were female athletes.

27 ¹¹³ HBO, *Student Athlete* (2018), www.hbo.com/documentaries/student-athlete (last visited July
 28 25, 2021).

247. The impact of the restraints on female athletes is further exacerbated by the NCAA's unequal treatment of female athletes. The largest revenue source for the NCAA is men's basketball, and the NCAA Tournament. The NCAA makes money from selling tickets and TV revenue. It then takes that revenue and pays a large percentage to conferences based on how many games are won by teams in the conference.

248. Women's basketball has become immensely popular. Take, for example, the 2019 Final Four in Tampa. It set attendance records. More than 3 million TV viewers watched Baylor's 82-81 victory over Notre Dame in the final. Roughly 274,507 fans attended the 2019 Women's Tournament. Yet, the women's teams and conferences received no payouts. So, a men's team receives a payout for just one win, while a female championship team receives nothing. This ultimately means the women's teams are under-resourced compared to the men and this under-resourcing depresses the value of women's NILs.

6. The challenged restraints cannot be justified by the purported need to cross-subsidize non-revenue sports.

249. The NCAA has also sought to justify its compensation restraints based on the purported need to prevent compensation to high-revenue-sport athletes from draining cross-subsidies to the non-revenue sports. This justification is legally and factually invalid.

250. First, the justification is, once again, not procompetitive. It amounts to arguing that the efficient allocation of a competitive market is somehow undesirable and that there is a need to suppress compensation to higher-revenue-generating athletes so that they can subsidize non-revenue-generating sports. That is an argument that competition itself and allocative efficiency are undesirable, which is not a procompetitive or legally viable justification under the Sherman Act.

251. Second, allowing compensation to high-revenue-sport athletes would not have a negative impact on any subsidies these sports provide to low- or non-revenue sports. The amount of these subsidies is tiny compared to the vast revenues generated by FBS football and Division I basketball, and thus any compensation for athletes in these high-revenue sports will not impact schools' ability to maintain their current subsidization of lower-revenue sports. In fact, history shows, that every time a new form of compensation has been permitted for Division I athletes—full

COA, *Alston* education-related benefits, third-party NIL payments—there has been no adverse impact on the subsidization of low- or non-revenue sports.

252. Third, if needed, the excessive compensation paid to coaches, athletic directors, NCAA executives, and Conference commissioners (among others) show that there is more than enough money to make up for any hypothetical revenue reallocation that could impact low- or non-revenue sport subsidies. In Division III—where there are no high-revenue sports to subsidize others—the schools themselves support all sports (which are, by definition, non-revenue), just like they do all other activities at their institutions.

253. In short, the claim that direct NIL or BNIL compensation, or college-athlete pay-for-play compensation would harm low- or non-revenue sports is both legally untenable and factually unsupported as a purported justification for the Defendants’ anticompetitive compensation restraints.

F. There is significant support for allowing athletes to receive NIL compensation and Plaintiffs have been damaged by Defendants’ anticompetitive restraints.

254. There is widespread support among college sports administrators, athletes, legislators, and the public at large for the concept of allowing Division I athletes to be compensated for their NILs. It is also clear that Defendants’ rules prohibiting such compensation have damaged and will continue to damage athletes absent a court-imposed remedy.

1. The NCAA and its members have made numerous statements supporting NIL compensation, in a stark departure from previous positions taken before federal courts.

255. Even while continuing to enforce the NCAA’s NIL restraints, representatives of the NCAA and its member schools and conferences made a multitude of public comments in recent years acknowledging the unfairness in the system and supporting the concept of allowing athletes to financially benefit from their NILs. That led to an official NCAA report issued on April 29, 2020 acknowledging that NCAA athletes should have the right to benefit from their NILs. The NCAA then stated that it was prepared to make official changes to its NIL rules in January 2021 that would permit some athlete monetization of NIL rights, before it delayed those plans after the Supreme Court granted certiorari in the *Alston* case. But, as explained above, after the NCAA lost in the Supreme Court in a unanimous decision making it clear that it was fully subject to scrutiny under the

1 rule of reason, and after the NCAA had its motion to dismiss denied in this case, the NCAA enacted
 2 its new “interim” NIL policy which permits Division I athletes to monetize their NIL rights in many
 3 (although not all) respects.

4 256. In 2015, NCAA Vice President for Regulatory Affairs Oliver Luck was quoted as
 5 saying, “I do believe that the name, image, likeness for an individual is a fundamental right—that
 6 any individual controls his or her name, image and likeness—and I don’t believe that a student-
 7 athlete who accepts a grant-in-aid simply waives that right to his or her name, image, likeness.”¹¹⁴

8 257. In March 2018, Mark Emmert acknowledged that the Olympic model, in which
 9 athletes are permitted to obtain third-party endorsement deals and other NIL-related compensation,
 10 was under consideration by the NCAA at that time, and he suggested that such a model could be a
 11 viable option for intercollegiate athletics: “There’s a lot of discussion about the Olympic model and I
 12 think it’s well deserving of serious consideration inside the context of college sports.”¹¹⁵

13 258. A 2019 CBS Sports survey of more than 100 Division I coaches revealed that 77
 14 percent of the coaches polled support an Olympic-style model for college sports that allows student-
 15 athletes to profit off of their NILs.¹¹⁶

16 259. During an interview on April 24, 2020, University of Michigan Athletic Director
 17 Warde Manuel voiced his support for the concept of allowing student-athletes to accept NIL
 18 compensation: “It’s the right thing to do... I think this is good for our [student-athletes]... It allows
 19 them to be considered just like any other student who would have the opportunity to profit.” Manuel
 20 rejected the claim, long relied upon by the NCAA to justify its restraints, that the outright ban on

1 NIL compensation is necessary to prevent the destruction of college sports: “Sometimes the doom
2 and gloom gets a bit much. We adapt, we move.”¹¹⁷

3 260. In a 2014 interview with CBS Sports, Notre Dame’s then-Athletics Director Jack
4 Swarbrick spoke out about the inequitable effect of the existing NIL restraints: “if our standard had
5 been what’s the rule for other students, capturing name, image and likeness outside team activity, the
6 musician at school doesn’t have that limitation. I’m not sure why the student-athlete should, either...
7 I think it would contribute to reducing so many of the problems we have which really spring from
8 this situation we created when we say they’re not going to be the same as other students.”¹¹⁸
9 Swarbrick reiterated this point as recently as April 2020, explaining that, “since regular students have
10 the opportunity to exploit their name, image and likeness, we’ve always felt students who are
11 athletes should have a version of that.”¹¹⁹

12 261. In October 2019, the Big South conference’s then-commissioner Kyle Kallander
13 echoed this sentiment:

14 “We must provide an opportunity for student athletes to benefit from NIL. I believe it
15 just makes common sense to allow athletes to be involved in entrepreneurship,
16 business, modeling, online initiatives, and other activities where NIL may be a factor.
17 Other students are taking advantage of this. Ours should as well. I’m even willing to
18 consider some athletics-related monetization—through autograph signing, jersey
19 sales, video games, etc. These activities can be directly tied to their individual NIL. It
20 makes sense.”¹²⁰

21 262. Numerous school officials have also expressed support for a change in the NIL
22 restraints. Nebraska’s then-head football coach, Scott Frost, stated that, “regardless of what change

comes in NIL legislation, we want every Nebraska athlete to be prepared with the blueprint for success beyond the field.” Athletics Director Garrett Klassy further indicated that Nebraska has “no concern” about changes to NIL rules. “We have the most passionate fan base and sponsors in the country and we fully expect them to continue to support Nebraska if NIL legislation changes.”¹²¹

263. University of Michigan’s then-head football coach Jim Harbaugh similarly confirmed that he and others in the UM athletic department “believe the name, image and likeness is a very good thing. A player should have the same opportunity that a football coach has to profit off their name, image and likeness... Again, not the best to have a rule that says you can’t. So we’re all for it. We’re all for name, image and likeness.”¹²² According to its official budget, UM received \$18.4 million in “corporate sponsorship” and \$9.4 million in “licensing royalties” in 2019.¹²³

264. Former Ohio State basketball coach Chris Holtmann expressed a similar sentiment: “I think given the amount of money that’s generated from college sports, in particular our sport the NCAA tournament, and obviously we know what a profound impact college football has on the overall economy of a university and a campus, I think it makes sense to allow guys, to allow athletes, men and women, to profit off of this. Again, I think it’s going to, just like the regular marketplace, it’s going to be significant for some and maybe somewhat insignificant for others. But that’s also a lesson as to what life is going to look like in the marketplace beyond college.”¹²⁴

265. Auburn men’s basketball coach Bruce Pearl stated in May 2021 that “the idea that they are going to be able to be compensated for their own name, image and likeness, it absolutely

1 makes sense. Auburn is going to kind of do everything we can to support those student-athletes and,
 2 from a compliance standpoint, manage it. There are limits to what we can do with it, but we'll pay
 3 very close attention to what's being done around the country and do everything we can to assist the
 4 kids."¹²⁵

5 266. Fresno State Athletic Director Terry Tumey also spoke out in support of student-
 6 athletes' NIL rights in March of 2021, explaining that "having folks understand how to better their
 7 brand is no different than a person going to business school and learning how to market a
 8 product."¹²⁶

9 267. Indeed, A-10 Conference Commissioner Bernadette McGlade explained in November
 10 2020 that "truly exceptionally elite student-athletes will have an incentive to pursue the collegiate
 11 experience with a more permissive legislative structure, and may benefit from a real-world
 12 'internship' type experience in managing their own NIL and the associated opportunities."¹²⁷

13 268. Kristin Williams, Senior Associate Commissioner for Institutional Services/Woman
 14 Administrator for the Mid-American Conference, confirmed that "the concern that this may create a
 15 recruiting benefit to institutions that have commercial entities willing and interested in supporting the
 16 student-athlete endorsements is not unique. For instance, there was worry that the allowance of cost
 17 of attendance would be a recruiting advantage/disadvantage and certain institutions would abuse this
 18 opportunity. This was not the case as the value managed itself, as any other recruiting opportunity
 19 has, and the commercial promotions to student-athlete's name, image and likeness would also work
 20 itself out through the market. The market will settle itself."¹²⁸

28 ¹²⁸ *Id.*

269. Former Big South Conference Commissioner Kyle Kallander also explained that “other than the legal risks, perhaps the other biggest concern of the membership with NIL is the ‘fairness’ issue. What if ‘his’ quarterback can make more on autographs than ‘mine’? Frankly, intercollegiate athletics isn’t ‘fair’ now, at least when using that type of test. Institutions have different levels of support, resources, and following. We shouldn’t let the fact that student-athletes at some institutions may command a higher monetization than others get in the way of a common sense solution.”¹²⁹

270. In October 2019, the NCAA announced that its governing board “voted unanimously to permit students participating in athletics the opportunity to benefit from the use of their name, image, and likeness in a manner consistent with the collegiate model.”¹³⁰

271. The board’s report concluded that “enhanced opportunities related to name, image or likeness would be an appropriate extension of efforts to modernize NCAA rules in a way that is consistent with our values and principles. We believe additional flexibility in this space can and must continue to support the collegiate model in clear contrast to the professional sports model.”¹³¹

272. The report continued:

“the working group generally believes student-athletes should be permitted to use their name, image or likeness to promote their own work product or business, particularly when the work product or business is not related to athletics. Even when the work product or business is related to athletics, the working group believes sufficient controls can be developed to mitigate potential abuse, including current rules related to recruitment offers and inducements and extra benefits, and permit student-athletes to pursue opportunities in a manner consistent with the collegiate model... It is important to note that NCAA bylaws already allow for student-athletes to have outside employment and business activity. This framework of review and regulation is specific to when student-athletes wish to lend their name, image or likeness to promote a student’s own enterprise or an employer’s business activity, such that name, image and likeness become intertwined.”

¹²⁹ *Id.*

¹³⁰ *Board of Governors starts process to enhance name, image and likeness opportunities*, ncaa.org, Oct. 29, 2019, <http://www.ncaa.org/about/resources/media-center/news/board-governors-starts-process-enhance-name-image-and-likeness-opportunities> (last visited July 25, 2021).

¹³¹ *Report of the NCAA Board of Governors October 29, 2019 Meeting*, ncaa.org, https://ncaaorg.s3.amazonaws.com/committees/ncaa/exec_boardgov/Oct2019BOG_Report.pdf (last visited July 10, 2024).

1 273. On April 29, 2020, the NCAA announced its official endorsement of a broad
 2 spectrum of recommendations from the working group that would allow college athletes to be
 3 compensated by third parties for commercial use of their NILs in “third-party endorsements or social
 4 media influencer activity... social media content creation and distribution, promotion of student-
 5 athlete businesses (music, art, athletic lessons, etc.), and personal promotional activities (autograph
 6 signings, etc.).”¹³²

7 274. Despite the fact that such compensation would not be tethered to educational expenses
 8 or costs incidental to college athletics participation, and could be substantial, the working group
 9 confirmed that it “has received feedback from all three divisions that illustrates allowing such
 10 compensation for promotional or commercial activities can likely be accommodated in a manner
 11 consistent with the NCAA’s model of intercollegiate competition.”¹³³ Indeed, the report explains that
 12 allowing student-athletes to receive such compensation could actually help them “directly offset their
 13 educational costs without undermining the Association’s model of intercollegiate athletics.”¹³⁴

14 275. Notably, the statements by the NCAA are a complete reversal from positions it took
 15 before the federal courts, including in the *O’Bannon* case. There, the NCAA insisted before the
 16 Ninth Circuit Court of Appeals that NIL payments—no matter how small—would be “anathema to
 17 amateurism,” would constitute “pay-for-play,” and would “blur the clear line between amateur
 18 college sports and their professional counterparts.”¹³⁵ The NCAA argued that permitting *any* NIL
 19 payments would destroy amateurism and be ruinous to consumer demand because such payments are
 20 not related to educational expenses:

21 “Contrary to the [district] court’s view, *amateurism is not simply a matter of the*
 22 *amount of any payment.* Allowing student-athletes to receive compensation for

 2014, ECF No. 13-1) (“NCAA *O’Bannon* Br.”); NCAA Mem. P. & A. in Supp. Summ. J. 28.

specific commercial revenue generated via use of their NILs is no less anathema to amateurism than paying football players \$100 per sack.”¹³⁶

276. In April 2020, the NCAA acknowledged that its “current rules related to NIL commercialization are in need of modernization,”¹³⁷ and directed its three divisions to draft NIL legislative proposals that are in line with the recommendations by 2021.

277. The NCAA suggested that its policy shift demonstrated a “willingness to respond to the evolving needs of student-athletes, and its long track record of providing remarkable opportunities for student-athletes to gain access to higher education,” but the NCAA’s announcement made clear that it “was primarily motivated to form the working group and charge it with reviewing the NCAA’s rules regarding student-athlete NIL by proposals of state and federal legislation on this topic.” The report also explicitly criticizes and downplays the positive benefits for student-athletes resulting from antitrust litigation against the NCAA, including what it terms ongoing litigation to “second guess the Division I membership,” and it has proposed that the NCAA “seek an exemption from federal and state antitrust laws.”¹³⁸ Indeed, while the NCAA claimed to be working towards some “modernization” of the NIL rules, it was actively and aggressively seeking an exemption from federal and state antitrust law that would allow it to continue its anticompetitive practices without legal repercussion.

278. The Associated Press also reported that the Power Five athletic conferences spent at least \$350,000 in the first three months of 2020 “as part of a coordinated effort to influence Congress on legislation affecting the ability of college athletes to earn endorsement money.” Those

¹³⁶ NCAA *O’Bannon* Br. at 57.

¹³⁸ *Id.*

1 expenditures came on the heels of a combined \$750,000 spent on lobbying by the NCAA, ACC, and
2 Big 12 in 2019.¹³⁹

3 279. And the Power Five conferences on May 23, 2020 sent a letter to congressional
4 leaders, where in the context of discussing potential federal NIL-related legislation, they requested
5 statutory immunity from certain antitrust laws and state laws protecting NIL rights.¹⁴⁰ In sum, while
6 the NCAA and its members were forced to admit that there is no legitimate basis to exclude athletes
7 from being able to commercialize their own names, images, and likenesses—their personal
8 property—the NCAA and its members also indicated that they would only want to permit such NIL
9 compensation if this could be done with continued restrictions to protect the NCAA’s own
10 commercial interests and antitrust immunity to boot.

11 280. In fall 2020, the NCAA’s Division I Council drafted legislation to allow athletes to
12 commercially benefit from their NILs, with a final vote set to take place in January 2021. But, as
13 discussed above, the NCAA halted moving forward with NIL rule changes after certiorari was
14 granted on December 16, 2020 in the *Alston* litigation. The NCAA was hoping the Supreme Court
15 would provide a legal opinion and framework that would provide it with protection to continue some
16 of the NIL restraints, without facing the prospect of continued antitrust liability for maintaining those
17 restrictions. Indeed, the U.S. Department of Justice sent the NCAA a letter warning it that continued
18 NIL restraints would be subject to antitrust review. In response, the NCAA Board of Governors
19 announced that it was going to delay making any NIL rule changes while it waited for the *Alston*
20 decision.

21 281. During the period before the Supreme Court’s *Alston* decision, representatives of the
22 NCAA and its member schools and conferences continued to make statements supporting the
23 concept of allowing athletes to financially benefit from their NILs. For example, in a hearing before
24

1 the Senate Committee on Health, Education, Labor & Pensions on September 23, 2020, University of
 2 Wisconsin Chancellor Rebecca Blank, who testified for Defendants during the *Alston* trial that
 3 Wisconsin “would have a very serious conversation about whether we wanted to continue under our
 4 current type of student athlete programs” if NCAA athletes were paid, stated: “New opportunities for
 5 NIL can exist within the confines of our student-athlete model . . . preserving the educational
 6 opportunities for hundreds of thousands, while modernizing endorsement opportunities for all.”¹⁴¹

7 282. Similarly, Auburn University’s then-Athletic Director Allen Greene stated in May
 8 2021 that at Auburn, “[w]e embrace NIL and welcome the opportunities and challenges. We fully
 9 support our student-athletes and their opportunity to utilize Auburn’s national brand to put
 10 themselves in the best position to capitalize on the benefits of NIL. Our mission remains to educate,
 11 support and develop our student-athletes at every moment to create Auburn men and women.”¹⁴²

12 283. Even former NCAA President Mark Emmert provided testimony before the Senate
 13 Commerce Committee on June 9, 2021 that the NCAA supported providing NIL opportunities for
 14 student-athletes (contrary to the NCAA’s longstanding rules to the contrary). At the same time,
 15 however, he requested federal legislation to provide a “safe harbor” against lawsuits from “lawyers
 16 using the weapon of antitrust laws” to challenge the NCAA’s NIL rules.¹⁴³ The NCAA thus made
 17 clear that it still hoped to continue some of its NIL restraints without antitrust scrutiny.

18 ¹⁴¹ Utah State University Athletic Director John Hartwell likewise confirmed: “We believe there
 19 is a way to provide additional income opportunities to student-athletes through NIL, while preserving
 20 the collegiate model and the student-athletes’ amateur status.” Karen Dennis, the Director of Track &
 21 Field at Ohio State University, distinguished NIL compensation from “pay to play” and testified:
 22 “Providing our student-athletes the opportunity to monetize their talents through NIL will allow them
 23 to grow and use their intellectual and creative talents beyond their athletic abilities. . . . Given the
 24 opportunity to brand themselves while in college with technical, intellectual, tangible and legal
 resources at their disposal, a greater number of student athletes will leave school better prepared for
 life and global citizenship.” Full committee hearing and the written testimonies of Rebecca Blank,
 Karen Dennis, and John Hartwell are available at:

 28 *Transportation, Written Testimony of Dr. Mark Emmert, President, National Collegiate Athletic*

1 **2. Statements from the Knight Commission on Intercollegiate Athletics.**

2 284. Roughly eight years ago, the Knight Commission on Intercollegiate Athletics
3 commissioned research on the topic of student-athlete NIL rights. In May 2016, Tulane law professor
4 and Associate Provost for NCAA Compliance Gabe Feldman presented a white paper to the
5 Commission in which he concluded that, at very least, that “the non-game related NIL restrictions
6 are unnecessary to the NCAA’s core goals and may actually be counterproductive,” and he
7 recommended an NCAA rule change “to allow student-athletes to secure endorsement deals or
8 otherwise receive compensation for use of their NILs, including value derived from their athletic
9 ability, as long as such use is not related to their participation in the underlying athletic event or
10 derivative of the underlying event (including broadcast, re-broadcast, etc.).”¹⁴⁴

11 285. While limited, the Knight Commission report concluded, among other things, that the
12 NCAA’s prohibition on non-game-related NIL compensation is “not necessary to preserve the
13 distinct character and product of amateur collegiate sports,” that “education and NIL payments are
14 not mutually exclusive,” and that “the restrictions on non-game related NIL deals do not prevent
15 exploitation—they are exploitative.”¹⁴⁵

16 286. On April 3, 2020, the Knight Commission issued a follow-up statement outlining its
17 current position on the issue of student-athlete NIL rights:

18 “The Knight Commission on Intercollegiate Athletics believes an updated model of
19 college sports is necessary to ensure the fair treatment of college athletes and to better
20 prioritize their education, health, safety, and success. This model must maintain the
21 two foundational elements that distinguish college sports from professional sports:
college athletes must be full-time academically eligible students and institutions must
be prohibited from paying them for their athletics participation.”¹⁴⁶

28 ¹⁴⁶ *Knight Commission on Intercollegiate Athletics Principles for New Rules on the Use of*
College Athletes’ Name, Image and Likeness, Knightcommission.org, Apr. 3, 2020,

1 **3. The NCAA has made exceptions for several years that have allowed some**
 2 **athletes to profit from the value of their NILs.**

3 287. Even before the NCAA’s “interim” NIL policy change, more than 200 legislative
 4 relief waivers have been submitted to the NCAA since 2015 requesting to allow certain athletes to
 5 use and/or profit from the use of their NILs in various commercial activities. According to Atlantic
 6 10 conference commissioner Bernadette McGlade, the NCAA has been approving waivers at a high
 7 rate to allow athletes to earn money if they want to develop a product or write a book, for
 8 example.¹⁴⁷ Approximately 95 percent of these waivers have been approved.¹⁴⁸ Since 2018,
 9 institutions have also had the flexibility to apply pre-set guidelines from a list of NCAA-approved
 10 waivers. According to the NCAA, “it is not possible to accurately account for these local waivers,
 11 but they likely significantly exceed those allowed by the NCAA.”¹⁴⁹

12 288. According to the NCAA, the waiver process has allowed athletes to use their NIL to
 13 promote products or businesses in the following types of circumstances:

- 14 a. An athlete was allowed to use her name and picture on a website and social media
 accounts to promote a clothing business that she created;
- 15 b. An athlete was allowed to use his NIL to promote a company that he created to
 16 provide personalized nutrition advice for clients; and
- 17 c. An athlete was allowed to use her name and photo on a website to promote a
 18 photography business that she had created (and that was named after her).¹⁵⁰

¹⁵⁰ *Id.*

289. As another example, Notre Dame women’s basketball player Arike Ogunbowale was granted a waiver in 2018 that allowed her to compete on the ABC television show *Dancing with the Stars* and to accept prize money from the show (contestants earn \$125,000 for appearing and \$325,000 if they win) while remaining NCAA eligible. According to the NCAA, it made this exception because it considered Ogunbowale’s participation on the show to be “unrelated to her basketball abilities.” But it is obvious that Ogunbowale was invited specifically because of her skills on the college basketball court—she was the star player of the 2018 March Madness tournament and made a game-winning shot at the buzzer to win the national championship for Notre Dame. That performance is what landed her on the Ellen Degeneres Show and the cover of *Sports Illustrated*, and there is no doubt it is what earned her a spot on *DWTS*.

290. These examples of student-athletes being able to profit from their own NILs, including in very publicized ways such as performing on *Dancing with the Stars*, have occurred while the revenue of college sports has continued to explode. Certainly then, it cannot be reasonably argued that allowing other athletes to obtain similar benefits would cause a decline in consumer demand.

4. NCAA Division I athletes have sought the ability to compete without anticompetitive restraint in the labor markets, and would receive such compensation absent Defendants’ unlawful restraints.

291. While some Division I student-athletes were lucky enough to obtain waivers from the NCAA prior to July 1, 2021, most were denied the opportunity to engage in any NIL-related activities and receive any NIL compensation without losing NCAA eligibility. Similar restraints have prevented them from receiving any compensation for their athletic services. Despite the NCAA’s purported aim “to create an environment that allows student-athletes to reach their full potential in academics, athletics and life”—and in contrast to their non-athlete counterparts—student-athletes know that even while participating in intercollegiate sports competition at a high level and attending college as a student at the same time, they have been unable to pursue NIL opportunities or other compensation opportunities from the conferences or the schools that could significantly benefit them financially, academically, and in their future careers.

1 292. On October 9, 2019, *The New York Times* reported¹⁵¹:

2 “An exuberant top-scoring floor routine by UCLA’s Katelyn Ohashi went viral this
3 year, making her one of the most famous college gymnasts ever. But NCAA rules
4 prevented Ohashi from making any money from the performance.”

5 In a video op-ed featured in the article, Ohashi argues that college students should be given
6 the ability to earn income from their athletic achievement:

7 “My senior year my routine went viral with over 100 million views. Along with this
8 came a lot of attention and opportunities, but I couldn’t capitalize on them. I was
9 handcuffed by the NCAA rules that prevented me from deriving any benefit from my
10 own name and likeness, despite the fact that after my final meet, I had no pro league
11 to join. How different would things be for me had I been able to use my image and
12 name in my last year of school in order to promote the things that I want to further my
13 future? I want to make sure that the next person doesn’t have to wonder.”

14 Ohashi continued: “It’s not about paying salaries to college athletes, it’s about
15 empowering student-athletes to rightfully earn off their individual name and likeness
16 without sacrificing the opportunity to get an education. It’s about making sure if a
17 student-athlete’s jersey is still selling in the bookstore ten years after graduation that
18 they get a cut. It’s about recognizing that women only receive 4% of all coverage in
19 sports media, and giving us the freedom to leverage sponsored deals to break through.
20 It’s about treating student-athletes with the same respect as the other student who can
21 freely profit off their talent as writers, artists, DJs, programmers, or scientists while in
22 college.”

23 Further she says, “critics say that allowing student-athletes to earn endorsement
24 income will come at the expense of Title IX or non-revenue-generating sports. But
25 from experience, allowing an athlete, especially a woman or Olympic sport athlete
26 who for the most part are staying and graduating from NCAA institutions to take
27 advantage of unexpected moments like I had, empowers us to help finally earn what
28 we deserve.”

29 293. Lilly King, a world record-holder, two-time Olympic gold medalist, and the
30 winningest breaststroke swimmer in NCAA history has also been an outspoken advocate of allowing
31 student-athletes to benefit from their NILs. King attended Indiana University (“IU”). She was forced
32 to turn down at least \$60,000 in bonuses when she set two world records at the 2017 World

33 ¹⁵¹ Katelyn Ohashi, *Everyone Made Money Off My N.C.A.A. Career, Except Me*, NYTimes.com,
34 Oct. 9, 2019, <https://www.nytimes.com/2019/10/09/opinion/katelyn-ohashi-fair-play-act.html> (last
35 visited July 25, 2021).

1 Championships, although the NCAA did arbitrarily allow her to keep the other more than \$100,000
2 that she was awarded by the USOC for her performance in the Olympics.

3 294. In October 2019, King explained that IU, the Big Ten, and the NCAA were able to
4 feature her in advertisements and announcements without compensation. They could promote her,
5 she said, but she wasn't allowed to promote herself. King was quoted as saying: "I won an Olympic
6 gold medal at 19. So I still had to wait three more years to do anything to promote myself [before
7 finishing school]. As an athlete. As a Hoosier. These are things I'm proud of being."¹⁵²

8 295. When Katie Ledecky swam for Stanford after the 2016 Olympic Games, she could not
9 accept an estimated \$5 million-per-year endorsement deal. Her teammate, 14-time NCAA champion
10 Simone Manuel, also forewent significant sponsorship opportunities.

11 296. Less than a week after the NCAA's March 12, 2020 decision to cancel its postseason
12 tournament basketball in the wake of the ongoing coronavirus pandemic, senior Oregon basketball
13 player Sabrina Ionescu, and teammate of Plaintiff Sedona Prince, initiated endorsement talks with
14 multiple brands. By the end of April, before she had even graduated from college, the 22-year-old
15 Ionescu had secured offers worth multiple times her expected WNBA salary, some of which even
16 outpaced the value of recent WNBA Finals MVP-level player deals. Ionescu ultimately signed a
17 multi-year endorsement contract with Nike.

18 297. If the NCAA had not prohibited her from doing so, Ionescu would have been able to
19 benefit from the value she provided to Nike and the money she was already generating for the
20 company and her university long before her college playing days were over. In November 2019, the
21 UO bookstore released a "White Nike Replica # 20 basketball jersey" representing the number 20
22 jersey that Ionescu wore for the Ducks. The \$75 jerseys sold out in less than an hour and have been
23 reselling for twice as much ever since.¹⁵³ In mid-December, Nike released another number 20 replica

28 ESPN.com, Apr. 17, 2020, https://www.espn.com/wnba/story/_/id/29051284/nike-signs-no-1-pick-sabrina-ionescu-multi-year-endorsement-deal (last visited July 25, 2021).

1 jersey in green which sells for \$75 at the university bookstore and on the retailer’s website to this
 2 day.¹⁵⁴ Because of the challenged restraints, Ionescu has received zero percent of the profits from
 3 these sales.

4 298. Analyses of the NIL value of student-athletes competing in several Division I sports
 5 also demonstrate the economic harm to Plaintiffs and class members caused by Defendants’
 6 restraints. On May 25, 2020, news website Axios.com reported estimates by Opendorse—a social
 7 publishing platform that helps professional athletes build their brands—of the social media earnings
 8 that student-athletes could obtain if they were not prevented from doing so by the NCAA. “Based on
 9 actual data from the last decade of providing the technology behind millions of dollars of
 10 transactions between brands and professional athletes,” Opendorse estimated positive earnings for all
 11 of the student-athletes in its sample analysis, which included football players, men’s and women’s
 12 basketball players, and female gymnasts. The analysis looked specifically at Twitter and Instagram,
 13 evaluating the per-post value for various student-athletes. Based on its formula, Opendorse
 14 estimated, for example, the annual lost value for social media posts by Sam Ehlinger, quarterback of
 15 the University of Texas football team, at \$962,000. As a second example, Morgan Hurd, a gymnast
 16 at the University of Florida, had an estimated potential earning value of \$44,000 from social
 17 media.¹⁵⁵

18 299. The website fivethirtyeight.com, which focuses on opinion poll analysis, politics, and
 19 economics, also reported estimates by Opendorse of the potential social media earnings for a
 20 different group of student-athletes. Opendorse’s appraisals were “based on a decade’s worth of
 21 transactional data between businesses and professional athletes, specific to each respective sport.
 22 Taking into account an athlete’s current audience size, engagement rate and seven other proprietary
 23 data points, [Opendorse CEO Blake] Lawrence and his team at Opendorse distilled their estimates of
 24

25
 26 ¹⁵⁴ *Nike College Replica (Oregon)* jersey, available at <https://www.nike.com/t/replica-oregon-basketball-jersey-d6B3WZ/P32919-OD1> (last visited July 25, 2021).

27 ¹⁵⁵ Jeff Tracy, *How much college athletes could earn as social media influencers*, Axios.com,
 28 May 25, 2020, <https://www.axios.com/college-athletes-earnings-social-media-influencers-35ce09f0-3bc2-46fa-ae5a-eba8ff61079b.html> (last visited July 25, 2021).

1 an athlete's post value on Instagram and Twitter—and a potential range of earnings.”¹⁵⁶ Opendorse
 2 examined the earning potential of student-athletes in nine different college sports—women's
 3 basketball, men's basketball, football, women's softball, men's wrestling, women's volleyball,
 4 women's soccer, and men's soccer—and projected positive social media earnings for each student-
 5 athlete examined. Two of the top four potential earners recognized in the study are female athletes,
 6 which is significant because women have fewer opportunities to continue their playing careers after
 7 graduating from college.¹⁵⁷ These analyses illustrate how the challenged restraints have had a
 8 negative economic impact on a wide range of Division I athletes, including those who are members
 9 of the Additional Sports Class, described *infra* in Part VII.

10 300. As explained above, there is now a natural experiment occurring where one can see
 11 how the NIL market has developed post-July 1, 2021, following the NCAA's suspension of many of
 12 its NIL rules. Within only a few weeks, thousands of student-athletes, female and male, across a
 13 variety of sports, at myriad Division I schools were making money from their NILs. Former NCAA
 14 President Emmert recognized that he and the NCAA were learning new things by the day in the post-
 15 July 1, 2021 world, including what is in the best interests of athletes. He recognized that NIL
 16 compensation would be going to athletes across many sports and the different NCAA divisions, often
 17 disconnected to pure athletic talent, and gave examples of sports camps, commentating and social
 18 media as areas with enormous financial potential.¹⁵⁸ These facts demonstrate the significant damage
 19 that the challenged NIL restraints have caused to student-athletes. Indeed, there has been no
 20 indication of any negative impact of this activity on consumer demand. To the contrary, the
 21 explosion of interest from consumer-facing companies in using athletes as product spokespeople is a
 22 strong indication that firms believe such payment will induce more consumer spending, rather than
 23 turn consumers off.

24
 25 ¹⁵⁶ Josh Planos, *How Much Money Could Student-Athletes Make As Social Media Influencers?*,
 26 fivethirtyeight.com, May 15, 2020, <https://fivethirtyeight.com/features/how-much-money-could-student-athletes-make-as-social-media-influencers/> (last visited July 25, 2021).

27 ¹⁵⁷ *Id.*

28 ¹⁵⁸ See *Inside the NCAA*, NCAA Social Series EP 65, Twitter.com, July 15, 2021,
<https://twitter.com/insidethencaa/status/1415831043098112001?s=21> (last visited July 25, 2021).

301. Moreover, as explained previously, the NCAA, conferences, and schools make an enormous amount of money from, among other things, television broadcasting agreements that involve the use of student-athletes' names, images, and likenesses. Defendants have been unjustly enriched from these deals at the expense of student-athletes, including those who are members of the Football and Men's Basketball Class and Women's Basketball Class, described *infra* in Part VII. In the absence of the challenged restraints, market-based competition would have led student-athletes to receive, among other things, a share of revenues for the group licensing of their BNILs. These athletes would be able to offer group licenses to their schools and conferences, which could in turn package them to broadcast and other companies with school and conference rights. Due to the ongoing unlawful NIL restraints of Defendants, members of the Football and Men's Basketball Class and Women's Basketball Class have been deprived of the opportunity to receive group licensing compensation for their BNIL rights that they otherwise would have received from NCAA members or conferences.

5. Corporate sponsors value student-athlete NILs and would compete for the rights to use Plaintiffs' NILs absent Defendants' anticompetitive restraints.

302. Business leaders have long recognized that, absent the challenged restraints, there would be significant opportunities for college athletes to make commercial use of their NILs. What has occurred since July 1 shows that to be true beyond a shadow of a doubt. Senior executives at the nation's leading influencer marketing companies are enthusiastic about the prospect of being able to work with student-athletes, and even before the NCAA announced its interim policy change, many had already put strategies into place to begin as soon as possible if the rules change to allow it.

303. According to Mae Karwowski, founder and CEO of Obvious.ly, about third party brands: "They're chomping at the bit. We're also ramping up our talent and recruitment efforts to make sure that athletes have the best possible representation and contracts as they're entering this space. People love sports, and social media is a huge overdue opportunity for college athletes."¹⁵⁹

¹⁵⁹ Kristi Dosh, *Marketers Bullish On Monetization Opportunities for NCAA Athletes with NIL Rights*, forbes.com, Dec. 3, 2019, <https://www.forbes.com/sites/kristidosh/2019/11/25/marketers-bullish-on-monetization-opportunities-for-student-athletes-with-nil-rights/#f25fd487aa49> (last visited July 25, 2021).

304. Stephanie Stabulis, Vice President of HireInfluence, confirmed that, “in 2018-2019 alone, our company has developed strategies for at least four to five brands targeting student-athletes, and we have been restricted due to the NCAA regulations. The demand is already there, so we see potential for brands to move quickly to work with student-athletes.” Regardless of their star status, Stabulis says there is money for student-athlete influencers at every level while they are still in college: “Because it’s a niche market, we can expect influencers to be able to make about \$250 to \$1,000 per post, at these lower beginning ranges. That will escalate as the athlete can reach more people through their social media outlets... For endorsement deals that rely on paying for an athlete’s name, likeness and deeper partnership or ambassadorship, we anticipate this is higher.”¹⁶⁰ A July 21, 2021 article reporting on the Bryce Young endorsement deals indicated that Tua Tagovailoa could have monetized his NIL at “three to five million easy.”¹⁶¹

305. Matthew Micheli, co-founder and managing partner at Viral Nation, explained that “some of these athletes could arguably be more popular than their pro counterparts. For example, Tua Tagovailoa in college football would probably out-earn 90% of starting NFL quarterbacks if given the opportunity. I could almost guarantee that.” Micheli says Instagram and YouTube are the two most valuable social media platforms for monetization right now and that a student-athlete with a following of over 25,000 could earn \$2,000 to \$4,000 per month between digital advertisements and local sponsorships. According to Micheli, “for athletes who produce video content, their earnings can easily be in the six-figure range annually to start.”¹⁶²

306. Micheli also commented on the extremely limited timeframe student-athletes have to take advantage of their NIL value: “Once the college athlete’s career is over and they don’t go pro, their marketability essentially goes away ... Endorsements will most likely become non-existent. They become old news unless they go pro or go into another career that would require them to keep

¹⁶² *Id.*

up a social presence. There could be some anomalies or outliers to this, but for the most part, all is lost for them, unfortunately.”¹⁶³

307. Former Fresno State basketball players Hanna and Haley Cavinder had as of March 8, 2021, 2.7 million followers on TikTok. According to the CEO of Opendorse, they have as much value as star quarterback Trevor Lawrence. A March 8, 2021 ESPN article reporting on the twins indicated they were being contacted by companies “every single day.”

308. Certain school officials now admit that allowing athletes to market their NIL enhances their educational experience. For example, Fresno State Athletic Director Terry Tumey stated, “Having folks understand how to better their brand is no different than a person going to business school and learning how to market a product.”¹⁶⁵

6. When The NAIA Withdrew NIL Restrictions, Athletes Prospered Financially and Academically.

309. In November 2020, the NAIA amended its NIL restrictions as follows:

SUBJECT: AMATEUR CODE – NAME, IMAGE, AND LIKENESS COMPENSATION

VII SECTION B ACTS PERMITTED BY NAIA AMATEUR CODE

The following acts will NOT cause an athlete to lose amateur standing.

...

6. Participating in radio or television programs for the purpose of promoting an amateur athletic event.
7. Receiving reasonable compensation for supervision of physical education, playground or recreational activities.
8. Receiving compensation for use of name, image or likeness to promote any commercial product or enterprise, or public or media appearance. It is the responsibility of the student-athlete to notify their institution’s athletics director in writing of any compensation the student receives from the use of their name, image or likeness in relation to their school or status as a student-athlete.

¹⁶³ *Id.*

¹⁶⁵ David M. Hale, *Social media stardom: How changes to NIL will benefit athlete-influencers across the NCAA*, ESPN.com, Mar. 8, 2021, https://www.espn.com/womens-college-basketball/story/_/id/30945653/social-media-stardom-how-changes-nil-benefit-athlete-influencers-ncaa (last visited July 10, 2024).

310. NAIA athletes immediately began to market their NILs and they have been incredibly successful in the new world of opportunities available to them. Then freshman Aquinas Volleyball player, Chloe Mitchell, became the first NAIA athlete to monetize her NIL in December 2020 when she turned a home project DIY video into a successful online brand. Since then, Mitchell has received numerous sponsorship deals that have allowed her to pay off her student loans, buy a computer and a car, and start saving for her first house. She also started a company called PlayBooked, which connects college athletes with fans and brands interested in doing NIL deals with them. As of March 2021, PlayBooked was already working with more than 200 NAIA athletes.¹⁶⁶ Mitchell says that her experience with NIL has been nothing but positive. Not only is she making money, but she says it has also made her a better student and is teaching her valuable marketing and business skills, and that the new opportunities have made her feel more connected with her teammates and peers on campus.

311. Hundreds of other NAIA athletes are also taking advantage of their new NIL opportunities. For example, basketball player Victor Faria is creating content on YouTube and using the money he has earned to pay for his tuition at Northern New Mexico College. Track and Field athlete Connor Clemens has already earned money from two promotional videos he created, and says that having the opportunity to monetize his NIL has been extremely helpful to be able to pay his bills and develop professional networking skills. And Clarke University lacrosse player, Tucker Labelle has also had a very positive experience in the new world of NIL.

VII. CLASS ALLEGATIONS

312. Plaintiffs Grant House, DeWayne Carter, Nya Harrison, Sedona Prince, and Nicholas Solomon bring this action under Federal Rule of Civil Procedure 23(b)(2) on their own behalf and on behalf of the following Class:

The “Declaratory and Injunctive Relief Class”—

All student-athletes who compete on, or competed on, a Division I athletic team at any time between June 15, 2020 through the date of any injunctive relief ordered by the Court.

¹⁶⁶ *Id.*

1 This Class excludes the officers, directors, and employees of
 2 Defendants. This Class also excludes all judicial officers presiding
 3 over this action and their immediate family members and staff, and
 any juror assigned to this action.

4 313. On behalf of the previously certified Declaratory and Injunctive Relief Class,
 5 Plaintiffs request an injunction permanently restraining Defendants from enforcing all of their
 6 unlawful and anticompetitive rules that restrict the compensation available to class members from
 7 conferences and schools, including those that limit the number of athletic scholarships available to
 8 class members.

9 314. Plaintiffs Tymir Oliver and DeWayne Carter also bring this action under Federal Rule
 10 of Civil Procedure 23(b)(3) on their own behalf and on behalf of the following Class:

11 The “Football and Men’s Basketball Class”—

12 All current and former college athletes who have received full GIA
 13 scholarships and compete on, or competed on, a Division I men’s
 14 basketball team or an FBS football team, at a college or university that
 15 is a member of one the Power Five Conferences (including Notre
 Dame), at any time between June 15, 2016 and the date of final
 judgment in this matter.

16 This Class excludes the officers, directors, and employees of
 17 Defendants. This Class also excludes all judicial officers presiding
 18 over this action and their immediate family members and staff, and any
 juror assigned to this action.

19 315. On behalf of the previously certified Football and Men’s Basketball Class, as
 20 amended herein, Plaintiffs seek the compensation that these class members would have received
 21 absent Defendants’ unlawful restraints on sharing game telecast revenue for their BNILs, the
 22 compensation that these class members would have received for their NILs from third parties for use
 23 in video games and in individual NIL agreements, including marketing, sponsorship, social media,
 24 branding, promotional and other NIL deals during the four years prior to July 1, 2021. In addition,
 25 Plaintiffs seek the compensation that these class members would have received, starting in the 2019-
 26 2020 academic year, absent Defendants’ unlawful restraints on pay-for-play compensation.

27 316. Plaintiff Sedona Prince also brings this action under Federal Rule of Civil Procedure
 28 23(b)(3) on her own behalf and on behalf of the following Class:

1 The “Women’s Basketball Class”—

2 All current and former college athletes who have received full GIA
3 scholarships and compete on, or competed on, a Division I women’s
4 basketball team at a college or university that is a member of one the
5 Power Five Conferences (including Notre Dame), at any time between
6 June 15, 2016 and the date of final judgment in this matter.

7 This Class excludes the officers, directors, and employees of
8 Defendants. This Class also excludes all judicial officers presiding
9 over this action and their immediate family members and staff, and any
10 juror assigned to this action.

11 317. On behalf of the previously certified Women’s Basketball Class, which is amended
12 herein, Plaintiffs seek the compensation that these class members would have received absent
13 Defendants’ unlawful restraints on sharing game telecast revenue for their BNILs, the compensation
14 that these class members would have received for their NILs from third parties for use in video
15 games and in individual NIL agreements, including marketing, sponsorship, social media, branding,
16 promotional and other NIL deals during the four years prior to July 1, 2021. In addition, Plaintiffs
17 seek the compensation that these class members would have received, starting in the 2019-2020
18 academic year, absent Defendants’ unlawful restraints on pay-for-play compensation.

19 318. Plaintiffs Grant House, Nya Harrison, and Nicholas Solomon also bring this action
20 under Federal Rule of Civil Procedure 23(b)(3) on their own behalf and on behalf of the following
21 Class:

22 The “Additional Sports Class”—

23 Excluding members of the Football and Men’s Basketball Class and
24 members of the Women’s Basketball Class, all current and former
25 college athletes who competed on a Division I athletic team at any time
26 from June 15, 2016 through the date of final judgment in this matter,
27 including those who (i) have received a full or partial GIA; and/or (ii)
28 received compensation for the use of their name, image, and likeness
since July 1, 2021 while a college athlete if they competed in the same
Division I sport prior to July 1, 2021.

This Class excludes the officers, directors, and employees of
Defendants. This Class also excludes all judicial officers presiding
over this action and their immediate family members and staff, and any
juror assigned to this action.

1 319. On behalf of the previously certified Additional Sports Class, which is amended
2 herein, Plaintiffs seek the compensation that these class members would have received for their NILs
3 from third parties in individual NIL agreements, including marketing, sponsorship, social media,
4 branding, promotional and other NIL deals prior to July 1, 2021, absent Defendants unlawful
5 restraints. In addition, Plaintiffs seek the compensation that these class members would have
6 received, starting in the 2019-2020 academic year, absent Defendants' unlawful restraints on pay-
7 for-play compensation. Plaintiffs also seek compensation for any additional scholarships these class
8 members would have received, starting in the 2019-2020 academic year, absent Defendants'
9 unlawful restraints on scholarships.

10 320. The Declaratory and Injunctive Relief Class, the Football and Men's Basketball Class,
11 the Women's Basketball Class, and the Additional Sports Class are referred to collectively herein as
12 the "Classes."

13 321. In addition to seeking certification of nationwide classes for their antitrust claims, *see*
14 First and Second Claims for Relief, *infra*, Plaintiffs also seek certification of a nationwide class for
15 purposes of their unjust enrichment claims, *see* Third Claim for Relief, *infra*.

16 322. The Classes are so numerous that joinder of all members is impracticable. While the
17 exact number of members each of the Classes is unknown to Plaintiffs at this time and can only be
18 discerned through discovery, Plaintiffs are informed and believe that there are several thousand
19 members of each of the Classes.

20 323. Plaintiffs' claims are typical of the claims of the other members of the Classes.
21 Plaintiffs and other members of the Classes sustained damages arising out of Defendants' common
22 course of conduct in violation of law as complained herein. The injuries and damages of each
23 member of the Classes were directly caused by Defendants' wrongful conduct in violation of laws as
24 alleged herein.

25 324. Plaintiffs will fairly and adequately protect the interests of the members of the Classes
26 and have retained counsel competent and experienced in class action litigation, including antitrust
27 class action litigation.
28

1 325. Numerous common questions of law and fact exist as to all members of the Classes,
2 and these common questions predominate over any questions affecting solely individual members of
3 the Classes. Although in many cases the Defendants admit that they have in fact engaged in the
4 conduct listed below, nevertheless among the questions of law and fact common to the Classes are:

- 5 a. Whether Defendants engaged in a contract, combination, or conspiracy to
6 unreasonably restrain trade by limiting the compensation available to members of the
7 Classes;
8 b. Whether such conduct caused members of the Classes to receive less compensation
9 than members of the Classes would have received;
10 c. The duration of the contract, combination, or conspiracy alleged herein;
11 d. Whether Defendants violated Section 1 of the Sherman Act;
12 e. Whether the conduct of Defendants and their co-conspirators caused injury to the
13 business or property of Plaintiffs and class members; and
14 f. Whether the Class is entitled to, among other things, injunctive relief, and if so, the
15 nature and extent of such injunctive relief.

16 326. Additional common questions of law and fact specific to the Football and Men's
17 Basketball Class, the Women's Basketball Class, and the Additional Sports NIL Class include the
18 following:

- 19 a. The appropriate measure of damages sustained by Plaintiffs and class members; and
20 b. Whether Defendants have been unjustly enriched.

21 327. Defendants have acted or refused to act on grounds generally applicable to the
22 members of Declaratory and Injunctive Relief Class, thereby making final injunctive relief
23 appropriate for the members of the Declaratory and Injunctive Relief Class as a whole.

24 328. Plaintiffs' claims are typical of the Class because the restraints on their compensation
25 for NILs and athletic services and available scholarships have injured both Plaintiffs and the
26 members of the Classes.

27 329. Plaintiffs are adequate representatives of the Classes and will protect the claims and
28 interests of the Classes. Plaintiffs do not have interests that conflict with those of the Classes and
Plaintiffs will vigorously prosecute the claims alleged herein.

330. A class action is superior to other methods for the fair and efficient resolution of this controversy. The class action device presents fewer management difficulties, and provides the benefit of a single adjudication, economy of scale, and comprehensive supervision by a single court. The damages suffered by Plaintiffs and each member of the Classes are relatively small as compared to the expense and burden of individual prosecution of the claims asserted in this litigation. Thus, absent class certification, it would not be feasible for Plaintiffs and members of the Classes to redress the wrongs done to them. It also would be grossly inefficient for the judicial system to preside over large numbers of individual cases. Further, individual litigation presents the potential for inconsistent or contradictory judgments and would greatly magnify the delay and expense to all parties and to the judicial system. Therefore, the class action device presents far fewer case management difficulties and will provide the benefits of unitary adjudication, economy of scale, and comprehensive supervision by a single court.

VIII. ANTITRUST ALLEGATIONS

331. Defendants' contract, combination, and conspiracy described herein consisted of a continuing horizontal and vertical agreement, understanding, and concert of action among the Defendants and their co-conspirators, the substantial terms of which were to artificially fix, depress, maintain, and/or stabilize prices received by Plaintiffs and class members for their NIL rights and athletic services, and to restrict scholarships available to Plaintiffs and class members in the United States, its territories and possessions.

332. In formulating and effectuating the contract, combination, or conspiracy, Defendants and their co-conspirators did those things that they unlawfully combined and conspired to do, including, among other things:

- a. agreeing to artificially fix, depress, maintain, and/or stabilize prices paid to Plaintiffs and class members for the use of their names, images and/or likenesses;
- b. agreeing to artificially fix, depress, maintain, and/or stabilize prices paid to Plaintiffs and class members for their athletic services; and
- c. agreeing to artificially fix, depress, maintain, and/or stabilize the number of scholarships available to Plaintiffs and class members.
- d. implementing and monitoring the conspiracy among cartel members.

1 333. The activities described above have been engaged in by Defendants and their
2 co-conspirators for the purpose of effectuating the unlawful agreement to fix, depress, maintain
3 and/or stabilize prices paid to and scholarships available to Plaintiffs and Class Members.

4 334. Defendants' actions constitute an unreasonable restraint of trade.

5 **IX. CAUSES OF ACTION**

6 **FIRST CLAIM FOR RELIEF**

7 **Violation of Section 1 of the Sherman Act – 15 U.S.C. § 1**
8 **Unreasonable Restraint of Trade**

9 335. Plaintiffs adopt and incorporate by reference all prior paragraphs of this Complaint as
10 if fully set forth herein.

11 336. Defendants and their co-conspirators, by and through Defendants' and co-
12 conspirators' officers, directors, employees, agents, or other representatives, have entered into a
13 continuing horizontal and vertical contract, combination, and conspiracy in restraint of trade in the
14 relevant markets to artificially depress, fix, maintain, and/or stabilize the prices paid to members of
15 the Classes for the use of, and to limit supply for the licensing and sale of their images, likenesses
16 and/or names and for their athletic services in the United States and its territories and possessions, in
17 violation of Section 1 of the Sherman Act (15 U.S.C. § 1).

18 337. Defendants' unlawful conduct deprived Plaintiffs and members of the Classes of
19 compensation for the use of their names, images, and likenesses and their athletic services. This
20 unreasonable restraint on competition has artificially limited supply and depressed compensation
21 paid to Plaintiffs and the members of the Classes for the use of their images, likenesses and/or names
22 and for their athletic services.

23 338. Plaintiffs and the members of the Classes received less than they otherwise would
24 have received for the use of their images, likenesses and/or names and their athletic services and in a
25 competitive marketplace, were thus damaged, and seek to recover for those damages.

26 339. Defendants and their co-conspirators' abridgment of compensation rights for current
27 and former student-athletes is not connected to any legitimate non-commercial goal. Defendants'
28 actions are solely to enhance revenue for themselves and their for-profit business partners by, for

1 example, being able to take all of the revenue related to the commercial use of student-athletes'
2 names, images, and likenesses for themselves. Defendants' actions have no relationship to any
3 alleged goal of "amateurism," or any legitimate procompetitive purpose. The NCAA's actions
4 directly regulate commercial markets and therefore are illegal.

5 340. As a direct and proximate result of Defendants' scheme, Plaintiffs and the members of
6 the Classes have been injured and financially damaged. Plaintiffs' and class members' injuries
7 consist of receiving lower prices for use of their NILs and for their athletic services than they would
8 have received absent Defendants' conduct. Plaintiffs' and class members' injuries are of the type the
9 antitrust laws were designed to prevent and flow from that which makes Defendants' conduct
10 unlawful.

11 341. Defendants and their co-conspirators have collectively conspired to illegally limit and
12 depress the compensation to student-athletes for the use of their NILs and athletic services. This
13 anticompetitive and illegal scheme has unreasonably restrained trade.

14 342. The anticompetitive effects of Defendants' scheme substantially outweigh any alleged
15 procompetitive effects that may be offered by Defendants, including that their collusive conduct is
16 shielded by the NCAA's concept of "amateurism." Moreover, reasonable and less restrictive
17 alternatives are available to Defendants' current anticompetitive practices.

18 343. The amount of damages suffered by Plaintiffs and the members of the Classes has not
19 yet been ascertained. Pursuant to Section 4 of the Clayton Act, Plaintiffs are entitled to recover from
20 Defendants treble the amount of actual damages, as well as an award of reasonable attorneys'
21 fees and costs of suit.

22 344. Plaintiffs and members of the Classes are entitled to a permanent injunction that
23 terminates the ongoing violations alleged in this Complaint.

24 **SECOND CLAIM FOR RELIEF**

25 **Violation of Section 1 of the Sherman Act – 15 U.S.C. § 1** 26 **Unreasonable Restraint of Trade – Group Boycott / Refusal to Deal**

27 345. Plaintiffs adopt and incorporate by reference all prior paragraphs of this Complaint as
28 if fully set forth herein.

1 346. Defendants and their co-conspirators, by and through Defendants’ and co-
2 conspirators’ officers, directors, employees, agents, or other representatives, entered into a
3 continuing horizontal and vertical contract, combination, and conspiracy in restraint of trade to
4 effectuate a horizontal group boycott of members of the Classes. Defendants’ group boycott/refusal
5 to deal encompasses Defendants’ concerted acts to prevent Class Members from being compensated
6 for the use of their images, likenesses and/or names and athletic services in the United States and its
7 territories and possessions, in violation of Section 1 of the Sherman Act (15 U.S.C. § 1).

8 347. Defendants’ group boycott/refusal to deal includes Defendants’ concerted action to
9 require all current student-athletes to abide by regulations. This concerted action is in effect a refusal
10 to deal with members of the Classes on compensation rights issues, and forecloses them from full
11 access to the marketplace. Defendants use the eligibility rules as a threat of a boycott to force all
12 student-athletes to abide by the rules.

13 348. Plaintiffs and the members of the Classes received less than they otherwise would
14 have received in a competitive marketplace, were thus damaged, and seek to recover for those
15 damages.

16 349. As a direct and proximate result of Defendants’ group boycott, Plaintiffs and the
17 members of the Classes have been injured and financially damaged. Plaintiffs’ and class members’
18 injuries consist of denial of compensation for use of their images, likenesses and/or names and
19 athletic services. Plaintiffs’ and class members’ injuries are of the type the antitrust laws were
20 designed to prevent and flow from that which makes Defendants’ conduct unlawful.

21 350. The anticompetitive effects of Defendants’ group boycott substantially outweigh any
22 alleged procompetitive effects that may be offered by Defendants, including that their collusive
23 conduct is shielded by the NCAA’s concept of “amateurism” or any procompetitive purpose.
24 Moreover, reasonable and less restrictive alternatives are available to Defendants’ current
25 anticompetitive practices.

26 351. The amount of damages suffered by Plaintiffs and the members of the Classes has not
27 yet been ascertained. Pursuant to Section 4 of the Clayton Act, Plaintiffs are entitled to recover from
28

1 Defendants treble the amount of actual damages, as well as an award of reasonable attorneys' fees
2 and costs of suit.

3 352. Plaintiffs and the Declaratory and Injunctive Relief Class are entitled to a permanent
4 injunction that terminates the ongoing violations alleged in this Complaint.

5 **THIRD CLAIM FOR RELIEF**

6 **Unjust Enrichment**

7 353. Plaintiffs adopt and incorporate by reference all prior paragraphs of this Complaint as
8 if fully set forth herein.

9 354. Defendants have been unjustly enriched as a result of the unlawful conduct detailed
10 herein at the expense of Plaintiffs and Class Members. Under common law principles of unjust
11 enrichment, Defendants should not be permitted to retain the benefits conferred upon them via their
12 wrongful conduct, and it would be unjust for them to be allowed to do so.

13 355. Plaintiffs seek disgorgement of all Defendants' profits resulting from the wrongful
14 conduct described herein and establishment of a constructive trust from which Plaintiffs and the
15 Class Members may seek restitution.

16 **X. REQUEST FOR RELIEF**

17 WHEREFORE, Plaintiffs, individually and on behalf of the Classes, request judgment as
18 follows:

- 19 A. For actual damages according to the proof at trial;
- 20 B. For treble damages pursuant to 15 U.S.C. § 15;
- 21 C. For a declaratory judgment declaring as void the NCAA's Bylaws that operate to
- 22 impose restrictions on the compensation Division I student-athletes can receive from the schools,
- 23 conferences, or third parties for their NILs or athletic services and the NCAA's Bylaws that operate
- 24 to impose restrictions on the athletic scholarships available for college-athlete labor services by
- 25 setting maximum numbers or amounts of scholarships that can be provided in each sport;
- 26 D. For an injunction restraining the NCAA and Conference Defendants from enforcing
- 27 their unlawful and anticompetitive agreements to restrict the (a) compensation available to Division I
- 28

1 student-athletes from the schools, conferences or third parties for their services or NILs; and (b)
2 athletic scholarships available to Division I student-athletes;

3 E. For Plaintiffs' attorneys' fees, costs, and expenses; and

4 F. For other such relief that the Court may deem just and equitable.

5 **XI. JURY DEMAND**

6 Plaintiffs, on behalf of themselves and all others similarly situated, hereby request a jury trial
7 on any and all claims so triable.

8 DATED this 26th day of September, 2024

Respectfully submitted,

9 HAGENS BERMAN SOBOL SHAPIRO LLP
